NEWS IN BRIEF

Mini 'lost' in PO pay dispute

WITH the telephone billing hacking approaching £200 million this week, neither side in the Post Office pay dispute (CW, May 10) has given way, and with systems such as Laces at Heathrow still out of operation, the Customs cargo warehouses are overflowing with uncollected imported goods.

Included in these is a minicomputer of US origin which was to be used for Prestel billing. It has been temporarily "lost" along with some of its discs.

Times stalemate

THE compromise offer by The Times management over direct input by journalists (CW, May 10) has been rejected by the National Graphical Association. The NGA has agreed, however, to meet again with management this week, in conjunction with the journalists' union.

Better printout

IMPROVED quality over conventional computer printout is one of the main reasons given by the Computer Management Group for deciding to install an 8,000 lpm Honeywell Page Printing System worth £125,000 at its Croydon headquarters.

Control system

BUILDING on its Videospac and Spec 200 range of industrial and process control equipment, Foxboro has added a micro-based control module called Microspec and a new communications network called Foxnet to produce an integrated industrial control system called Spectrum.

DECWRITER IV

- True 30cps print speed
- Adjustable character widths
- Adjustable line spacing
- 9 x 7 dot matrix printing for clear characters
- Sculptured typewriter-style keyboard
- Desk-top lightweight design
- Full width 132 column printing
- 128 ASCII upper- and lower-case characters

After the silicon machines...

ALTHOUGH the next top-end machine from Univac will still use Emmitter Coupled Logic (ECL) technology, and be between four and six times as fast as the Univac 1100/80, the next system could feature semiconductor circuitry based on Gallium Arsenide (GaAs). That is how Barry Borgerson (right), director of research and technical planning for Univac at Blue Bell, Pennsylvania, sees it. He told Computer Weekly that the next ECL-

based machine would appear in three to four years, and that it would probably be another four years before the GaAs version was ready for delivery.

Commenting on the advantages of GaAs, he said, "It has up to six times the electron mobility of silicon, and can therefore operate up to six times faster. Also, we have found that by cooling GaAs circuits with liquid nitrogen we can get even further speed improve-

ments — up to four-fold increases compared to normal operating temperatures." And since GaAs semiconductors feature an insulating substrate, another feature is low power consumption.

The use of cryogenically cooled Josephson Junctions is also being looked at by Univac, specifically those manufactured from niobium or lead. These are "maybe a decade or more" away in development.

BORGERSOON... "Six times faster than silicon..."

Norsk adds two models to mini line

NORWAY'S enterprising minicomputer manufacturer, Norsk Data, has added two formidable new models to its Nord line of minicomputers. Called the Nord-500 and the Nord-100, they will be available in the UK through Richard Norton (Nord) of London.

As with the earlier Nord-50 and Nord-10/S, the 500 is 32-bit machine and the 100 is 16-bit, and a 100 is required as front-end to a 500, with both machines sharing the main memory.

The Nord-500 offers an enormous eight Megawords, 32 Megabytes of main memory capacity and is three times as powerful as the Nord-50. The maximum main memory is double that available on the

largest IBM machine, the 3033.

It is rated at five million instructions per second, and has a minimum 32K-byte cache, extendable to 64K-bytes. The cache is allocated half to data and half to instructions, and can be sub-allocated to different applications in a multiprogramming environment.

It includes hardware floating point arithmetic operating on 32 and 64 bits, and maximum disc capacity is 4.3 Gigabytes of data and 4.3 Gigabytes of instructions.

The Nord-100 uses the AMD 2900 bit-slice family, and also supports a maximum 32K-bytes. It is built around a 1.8 Megaword per second bus, and without cache matches the performance

of the Nord-10/S with cache. Adding a 2K-byte cache and fast memory management improves performance to between 1.2 and 1.9 times that of the 10/S.

Both machines run under the standard Sintran III VS operating system, which together with the Fortran 77 compiler is included in the hardware price. IBM compatible RPG II, Ansi 74 Cobol, Basic, Pascal, Coral 66 and Simula compilers are all charged, as is the Sibas database system.

Minimum Nord-500-100 configuration with 258K-bytes of memory, 37 Megabytes of disc and a tape unit costs £120,000, and will be available early next year. The Nord-100 is available now.

Suspension threat angers GEC men

GEC development engineers, currently involved in a pay and grading structure dispute with the company (CW, May 10), have said that they will find higher-paid jobs elsewhere if the management goes through with its threat to suspend those still taking action after May 21.

A letter from the company to all 450 development engineers at GEC's two Coventry sites said the strike action by only 16 key people was "a seriously affecting" system X work.

This letter has incensed many of our members, "said an ASTMS spokesman. "The company could lose the goodwill we have been showing during the strike. We have attempted to hit only short-term work, not long-term prospects."

Merger meeting

THE IDPM's micro and management conference is to be preceded by an extraordinary general meeting at the Bloomsbury Centre Hotel, WC1, on May 23 starting at 10 am. The main items on the agenda are resolutions covering the IDPM-DPMA merger.

Available NOW!
LA 34 DECwriter IV
30cps desktop printer

Smaller, lighter and quieter than many typewriters. Standard features include a cartridge for simple ribbon changes and condensed characters.

ALSO AVAILABLE:
Newbury Laboratory's latest range of VDUs:
the M22 high speed, paper-tape reader punch;
the versatile Tally T1012 180cps bi-directional printer; and the full range of DEC LSI-11/2 systems and components.

CEGB first user of new software

TELECOMPUTING has won its first customer for native mode 2900 TPS in the form of the Central Electricity Generating Board. The CEGB's North-east region is expected to be the first user of the new software and is planning to go live early in 1980.

As a prior step, Telecomputing has contracted to demonstrate that the region's existing TPS applications under 1900 can be run under VME/B without change. This demonstration is scheduled for October.

Subsequently, two out of the other four CEGB regions are scheduled to convert to 2900 VME/B — the South-west and the Midlands. Both already have TPS-based applications running in 1900 mode.

Telecomputing has for some time been committed to developing native mode 2900 versions of TPS, to ensure the forward compatibility of TPS-based applications systems. However it has until now assumed that a VME/K product would be the first required and last year ordered a 2050 specifically to develop the K version (Software File June 20, 1978).

The CEGB contracts mean that a VME/B version will now appear and represent a significant vote of confidence for Telecomputing in the wake of recent ICL TP announcements (CW, April 19).

Briefing
SDL to set up viewdata centre

INSAC members Systems Designers, has been picked to establish a systems division for the Insac International Viewdata Centre.

The centre is being set up in London to show potential customers the Post Office's Prestel system in action (CW, February 8).

The systems division will be at SDL's premises in Frimley, Surrey, equipped with a large GEC 4082 mini. It will provide support and development services for companies and organisations buying rights to the Prestel software and system throughout the world, including the US.

Borgerson leaves

AFTER just over two years with Univac at Blue Bell, Pennsylvania, as the company's director of research and technical planning, Barry Borgerson has left to join software and communications company Manufacturing Data Systems of Ann Arbor, Michigan.

World market

A KEY feature of the proposed acquisition by Sanders of plotter systems specialist Calcomp (CW, May 17), is that it will provide Sanders with a ready-made worldwide end-user marketing network for its graphic display systems.

First samples

FIRST wafers of Motorola's new 16-bit microprocessor, the 68000, have passed through the production process at the company's plant in Austin, Texas, with a fair measure of success.

A spokesman for the company said that only "one or two" problems needed to be sorted out in the second iteration of the design, and samples are now expected in August.

Fujitsu line

THE bottom end of the new F series of Fujitsu's MIXO line, which covers models from the M130 to the M160, uses a CPU constructed of newly developed Schottky technology master slice arrays. A master slice is an array of defined logic elements of various types which are interconnected to form a variety of higher-level circuits at the final stage of fabrication.

Disposable mini

"DISPOSABLE", 10-bit minicomputer is to be launched by Computer Automation that should be cheaper to throw away than repair. This is the idea behind Scout, which could be the light of day at the NCC in New York. A typical system could cost \$1,000.

Bid for video firm

Is electrical and electronic conglomerate Bunker Ramo, known in the computer industry for its video terminals, is considering a bid from Fairchild Industries which would involve Bunker Ramo increasing its holding

Julia chair's BCS group for disabled

New chairperson of the BCS specialist group for the disabled is Julia Howlett, pictured here with her guide dog Boudi.

Julia, who is partially sighted, at present works at the National Physical Laboratory, where she is project leader for Mova, a micro-based device providing a wide range of aids for the disabled (CW, October 12, 1978). She is leaving shortly to set up her own company, St Margaret's Software.

In her new role, Julia hopes to use her contacts in the world of research to stimulate applied research and development into aids for the disabled, with particular reference to microcomputers.

DataGen offers Pascal

EVIDENCE that Data General's Advanced Operating System has been seen by the company as its future standard has been provided by the release of an AOS-subset, called Micron, for the 16-bit MicroNova.

Said to be designed for real time microcomputer applications, Micron is a multi-tasking operating system and comes with AOS-compatible Pascal and Fortran IV compilers. An as yet running AOS can therefore operate as a multi-user development system for the MicroNova.

Universities share

INTERACTIVE and batch operations at the University of Lancaster will be available on an ICL 2980, which replaces an ICL 1905F scientific machine. The new system will also become part of the North-West Universities Network, made up of five ICL 1900 and three CDC 7800 machines. The NWUN allows the universities of Keele, Lancaster, Liverpool, Salford, and the University of Manchester Regional Computer Centre to share resources using packet

NEB 'chief sacrificial victim'—Varley

INDUSTRY Minister Sir Keith Joseph refused to spell out in the Commons any specific government plans for the National Enterprise Board or any of the projects it has sponsored or the companies in which it has an investment.

Making his first speech in his new post during the Queen's Speech debate Sir Keith said there was bound to be a transitional period and his department would be reviewing the assistance to industry generally.

He added "A great deal of provision has already been allotted and the scope this year will be significantly less than the scope in my department in years to come."

When the House divided, the Labour amendment protesting at the plans to restrict the NEB and sell off parts of the nationalised industries, was rejected by a majority of 82.

The resumed debate had been opened by Eric Varley, Labour's Industry Secretary, who said Tory plans to carve up and sell off the profitable parts of the nationalised industries was an act of wanton industrial mayhem. He said the chief sacrificial victim was going to be the NEB.

Companies which had prospered for decades under public

Next 4300 a field upgrade

IN a radical departure from its usual marketing policy, IBM's next E Series machine is to be offered as a field upgrade from the 4331. Expected to be known as the 4336, it will fall between the 4331 and the 4341, offering a powerful boost to users who have ordered the smaller system and want an on-the-job update. Launch of the new machine is set for next month and it could make its debut at the NCC in New York.

While both Aaron Orlansky, now with stockbrokers Dean Witter Reynolds, and Bob Fertig of Advanced Computing Techniques, agree on a date for the 4336, there is less certainty about the next two models at the top of the range — a 4341 which would be an upgrade from the 4341, and a 4351.

Fertig believes that IBM would have liked to have added a 4346 this year, but that it may have been held up by manufacturing difficulties with the 4341, centring either on the cache memory or the processor itself.

Orlansky believes that whatever problems there were, have been solved, but anyway does not expect a 4346 model until the middle of next year.

At the other end of the scale, Orlansky still believes that the first models of the H series, to replace the 3030 series, will be announced in the middle of 1980, for deliveries in 1982. This means that the 3030 series will be around for considerably longer than IBM intended. The main reasons are that the quite unexpectedly high demand for the 3030 series machines caused deliveries to be strung out over a period of years, and the demand for all IBM's new products is straining the company's manufacturing resources.

"IBM is not prepared to make major investments in new manufacturing capacity to meet short-term demand," comments Orlansky. "I believe they may increase capacity next year, but

AS an exploratory step towards formulating UK and European policies on software certification, the NCC is to hold a two-day workshop in conjunction with the relevant French and German agencies, BNL and GMD.

The workshop, scheduled for September, will concentrate primarily on the validation of language implementations. Among topics to be discussed are methods of compiler testing; the requirements for testing; and relevant regulations already introduced in Europe and elsewhere.

Other details are as announced at Hannover.

Don't waste time Bishop's move used all the best bits

A READER in Chislehurst has turned up an interesting example of the use of a binary character code long before the Information Age. He refers to the Shutter Telegraph, which was used during the Napoleonic Wars to communicate between London and Dover, before the introduction of the better-known semaphore telegraph. The system, which was invented by, of all people, the Bishop of St David's, enabled messages to reach the coast from London in only seven minutes.

Webb's "History of Chislehurst", published in 1899, describes the building in the town that served as one of the telegraph stations. On its roof was a frame from which hung six swinging shutters. When these were held up, end-on to the observer, they would be invisible, and represented binary 0. Let down and visible, they indicated 1. Thus there was a tel-character code which represented the whole

alphabet and a range of commonly-used phrases. At each of the chain of repeater stations from London to Dover, a chap would squint through a telescope at the neighbouring station and set his shutters to match.

The system was used from 1798 until 1818, when the loss of the semaphore telegraph came along, with its swivelling arms like Navy signalers' flags.

I have no hand-rate figures for the Shutter Telegraph's light transmission speed, but I can't imagine they were very high. It is also difficult to conceive of a system that is less secure. What do you do when you catch a suspected telegraph tapper and he claims that all he was doing was watching Great Crested Grebes?

Just think — if the semaphore hadn't come along we might now be using Elnsepal code instead of Ascii.

How does all this relate to the design of working environments for data processing personnel? Let's first look at the aims of ergonomics.

Ergonomics is a problem-solving method which aims to improve the quality of working life by better design of machines and working environments. It relies heavily on the "human sciences", and psychology, physiology and applied anatomy in particular.

As far as environments are concerned, it looks at problems of heating and ventilation, lighting, noise levels, vibration and provision of adequate space. And most important: the measurement of effectiveness of design is by assessing how different arrangements affect the way in which work tasks are carried out.

This is at the source of the trouble — what is appropriate for one kind of task may not be in another situation, for example lighting. Whenever VDUs are used, this is probably the most important factor of all.

Making working life more comfortable for the individual

IN the last few years, ergonomics has been taken into account in the design of work places, more than ever before. From the ergonomist's point of view, this is encouraging, yet in some ways it represents a transition from ignorance of ergonomic principles to misunderstanding.

In the design of some installations the ergonomic approach has been adopted wholeheartedly, but in other cases little more than lip-service has been paid. Often it seems the word "ergonomic" has been applied as no more than the latest advertising catchphrase. Unfortunately for the ergonomist, the next stage of development will not be easy.

The problem lies in the fact that people are not machines and an "ergonomic" design process that does not take this into account can produce results which may be even worse than ignoring human factors altogether.

To put it another way, people are complex and a simple set of recommendations is unlikely to be adequate. At the same time a relatively simple method can readily improve the quality of design.

How does all this relate to the design of working environments for data processing personnel? Let's first look at the aims of ergonomics.

Ergonomics is a problem-solving method which aims to improve the quality of working life by better design of machines and working environments. It relies heavily on the "human sciences", and psychology, physiology and applied anatomy in particular.

As far as environments are concerned, it looks at problems of heating and ventilation, lighting, noise levels, vibration and provision of adequate space. And most important: the measurement of effectiveness of design is by assessing how different arrangements affect the way in which work tasks are carried out.

This is at the source of the trouble — what is appropriate for one kind of task may not be in another situation, for example lighting. Whenever VDUs are used, this is probably the most important factor of all.

Not that there's anything mysterious about VDUs. But they do present a set of exacting visual demands which are quite unusual. Source documents, or indeed any paperwork, will require plenty of light for ease of reading.

The mechanism, of course, is one in which light is reflected from the page — and in which white paper reflects more than black ink. A VDU screen on the other hand is luminous and independent of external light sources — and for optimal legibility needs a relatively low

By Michael Ballantine

THE ergonomic approach aims to improve the quality of working life by better design of machines and working environments. Malcolm Ballantine, lecturer in the Department of Occupational Psychology at Birkbeck College, University of London, considers some problems facing designers.

room brightness. This may seem obvious, yet an adequate compromise is quite difficult.

What's more, if high levels of concentration are necessary it's important to keep glare down. Glare-free light, on the other hand, produces a rather gloomy, flat appearance. Even when it is quite bright it can be to look at shadowless faces all day long. The answers clearly depend on circumstances — and on the tasks being performed.

In some situations — for example, air traffic control rooms — accuracy of reading must be all-important. In data-entry applications such as key-to-disc work, the aims are to ensure minimal eyestrain and keep a pleasant-looking environment. And in those applications where a casual user uses a terminal for no more than a few minutes at a time, the ergonomist has little to offer which could be justified economically.

Heat and ventilation tend to present few problems in com-

puter installations. It is important to keep temperatures and humidities within acceptable ranges, but tapes and discs are usually even less tolerant than people. Air flow, however, may need to be examined. Too high a rate of air flow is usually called a draught, but too low a rate is less obvious.

Most complaints of "stuffiness" are in reality complaints of insufficient air flow. As far as noise is concerned, printers are the main culprits, although there have been big improvements recently. Deve-

quite unpleasant — and is responsible for reduced efficiency. Once again it depends on what you are doing.

The effects of vibration have been looked at in great detail by ergonomists. In most computer applications few effects are important, but in special circumstances things can happen. For example, that vibration in a car's steering wheel can be a nuisance. In a similar way, a matrix LED display can be illegible. An interaction between the "strobe" rate by which decoders are multiplexed to display digits and typical refresh frequencies makes the characters appear to disintegrate.

There is enormous scope for improvement in the provision of adequate workspace. Enough space for people to work — including enough to move around — must be provided, but the ergonomist goes further than this. And this point also features an important aspect of the ergonomic approach. It has enough to look after the "average" person — one who looks at the range encountered in the whole population.

Point by point, "minor" issues are taken — some of the largest expected problems are sometimes the average. Space under a table top, for example, will be determined by the largest person to be accommodated, while if something has to be within reach the smallest person must be considered. And, again, the task being performed will have a major impact.

Overall, the ergonomic approach involves evaluation of terms of who is involved and what they are doing. The answers depend on so much of circumstances that simple recommendations are really very impractical, yet an appropriate design method can offer considerable improvement.

At the same time environmental factors represent the simplest problems which we have to come to terms with. People are to be taken into account. Matching in terms of the more subtle aspects of psychological function demands even more.

But the main difficulty lies in persuading people to adopt a different approach, one which involves the designer tolerating the obligations which must be humans human.

DEC wins £1m contract to monitor radar equipment

A NETWORK of Digital Equipment computers with communications based on the X25 packet switching protocol is being set up by the Civil Aviation Authority for monitoring and controlling remote radar installations.

Under a contract worth more than £1 million, DEC is supplying the CAA with 24 PDP-11 and LSI-11 processors, and is designing and implementing the applications software.

The network will centre on a dual PDP-11/70 configuration at the London Air Traffic Control Centre at West Droyton, Middlesex, which will be linked to a PDP-11/34 at each of six long-range radar stations located throughout the UK.

Data will be displayed at West Droyton on DEC VT30 colour terminals and remedial action required relayed back to the remote radar station.

If West Droyton falls, each remote 11/34 system can continue under local operation.

Advantages offered by the US include no language problems, a similar legal structure to the UK and the sheer size of the market.

Coggan commented, "The sales opportunities in the US are an order of magnitude greater than over here."

Called the Gamma Computer Corp, the US subsidiary is based at Manchester, New Hampshire, a location selected for several reasons, including its proximity to DEC's headquarters in Massachusetts and the fact that New Hampshire offers the special attraction of having no state taxes.

Heading the Gamma Computer Corp as vice-president is Patricia Colbert, a former DEC marketing development specialist whose projects at DEC included setting up the firm's retail computer stores.

With a turnover of about £3.5 million in its last financial year which ended in April, Gamma is a lot bigger than most DEC systems houses in the US and has developed a range of applications packages that will be tailored by Gamma Computer Corp staff for the US market.

All the hardware used by Gamma Computer Corp will be bought from DEC in the US, while Gamma in the UK will continue to buy from DEC over here.

Systeme plans US sales drive as well

GAMMA's biggest competitor in the DEC systems business, Systeme of Leeds, also plans a move into the US market. The main difference is that Systeme will be selling systems software products there. The most important of these at the moment is Systel, the teleprocessing package developed with financial help from Inspec, the NEB's international software marketing consortium (CW, April 26).

Systeme says that it will not start selling in the US until next year, and that it will go ahead by itself if Inspec is wound down as a result of the new government's policy of restricting the activities of the NEB.

Keen to import Apple II

FOLLOWING discussions between the two companies, Keen Computers in Nottingham is to import the Apple II Computer direct from the makers in Cupertino, California.

Keen is setting up a distribution network in the UK and is also expanding its software development operations. The intention is to provide an increased range of packaged software for the Apple

Govt's DP export figures still in chaos

By Keith Jones

ALL the 1978 export figures for digital and analogue systems are missing from the latest set of Department of Industry statistics on computer sales because of the major inaccuracies in the overseas trade figures for analogue and hybrid computers revealed exclusively in Computer Weekly earlier this year (CW, February 8).

The latest set of DoI statistics relate to the fourth quarter of 1978 and are complete apart from the export figures for the two related categories — digital

systems and analogue/hybrid machines.

The DoI has decided to leave them out because the faulty analogue/hybrid figures printed in the first three quarters' statistics for 1978 have not yet been fully revised by the Customs which supplies the DoI with all its overseas trade figures.

The DoI assured Computer Weekly that revised figures for 1978 would appear in the statistics for the first quarter of 1979 which should be published in

about three months.

The faulty analogue/hybrid figures would have shown an unbelievable total export figure of £73 million for 1978 compared with less than £13 million in 1977. According to the Customs, the problem was caused by export agents putting other types of computer equipment under the analogue/hybrid heading.

The Customs said that the number of agents involved was fairly small and that they were now aware of what they had been doing wrong.

Customs pointed out that major revisions had already been made to the original faulty figures but that final revised figures would not be released until next month. It is normal practice for the Customs to publish final revised figures for all the previous year's overseas trade around June.

The DoI statistics also include figures gathered from manufacturers on their total sales, including exports, and these show that total sales of all types of equipment increased from £174 million in the fourth quarter of 1977 to more than £255 million in the same period last year.

Progress on statistics

THE computer industry sector working party at the National Economic Development Organisation appears to be making real progress now in its efforts to persuade the Customs to provide more detailed overseas trade statistics for computers.

The computer SWP secretary, Rag West, told Computer Weekly that the level of co-operation from the Customs had improved considerably since early this year when Neddov's problems were highlighted in Computer Weekly (CW, February 15).

The biggest cause of discontent in the computer SWP at the moment is that several different types of peripheral equipment are lumped together under the completely unhelpful heading "other peripheral units."

Imports listed under this heading came to £250 million last year but this figure gives no indication of what types of foreign-built peripheral equipment were increasing their share of the UK market.

West said that a breakdown into about six different peripheral categories was hoped for.

"Finding qualified analysts and programmers is our biggest problem."

"MARK IV® is the answer for us. It saves 60 to 90 percent in staff time."

MARK IV is today's most comprehensive and cost-effective application development system — with completely transparent interfaces and on-line query facilities to the most widely used DBMS.

With its more than 2000 automatic functions, MARK IV dramatically increases the productivity of your people. Application systems can be implemented and maintained in a fraction of the time. Basic procedures can be mastered in a few hours, even by untrained programmers.

Major savings on every score. Compare MARK IV with Cobol:

- Programming — MARK IV is 6x faster
- Testing/debugging — MARK IV is 5x faster
- Documentation — MARK IV is 3x faster

- Maintenance — MARK IV is 8x faster
- Education — MARK IV is 10x faster

The proof: MARK IV has been tested in more than 1400 installations worldwide, over more than a decade of cost effective use. It has been continuously updated, with over 2000 enhancements and 20 major releases.

Find out how much MARK IV can do for your operation. Call or write today.

BTI ADVANCED MATHEMATICS - Exercise 1

BTI x5000
-30%
+OEM
SOFTWARE
=ADDED
VALUE

Does your current system supplier offer you:

- 30% discount on two or more systems?
- Free programme development time on one of the in-house systems?
- A system expandable from 30 to 264 megabytes, disk storage?
- Multi-terminal facilities capable of handling up to 32 users simultaneously?
- Full 24-hour manufacturer maintenance — nationwide?
- A system with 60 megabytes of disk storage for less than \$37,000?

If he doesn't, then you should be talking to us because we do.

Send your answers to:

Packaged software growth

THE market for independent packaged software will grow by about 20% a year, reaching \$2 billion by 1983, according to the latest projections by International Data Corp.

Greatest growth will be shown in application software, says IDC, which will take 55% of the market in 1983 as against 47% in 1977. Of utility software, report generators and job accounting packages are tipped to show strongest growth, with an annual increase in revenue of 3% and 35% respectively.

The trend towards distributed processing will boost the demand for communications software, but without lifting system software in general from its position as the slowest growing sector.

The report notes that lack of awareness of third-party alternatives is still a factor limiting the growth of the market, particularly for application software.

Hidden line

A SET of hidden line routines for graphics system builders has been generally released by Cambridge Interactive Systems. Called HLR, the software is written in a strict subset of Asci Fortran, to ensure portability, and includes an automatic partitioning module.

GILB'S MYTHODOLOGY

Let's make security engineering a serious discipline

SECURITY is critical to many computerised systems. But our methods of designing secure systems are too informal, in my opinion, and this lack of formal design methods is itself a threat to the security of our systems.

The typical book or article on security consists of check-lists of things to consider and lists of "do and don't" rules. None of the many articles and books I have seen on security has taken the trouble to quantify the effectiveness and the costs involved with each technique. I believe that if the author of such books and articles is really expert then they should be able to give some quantitative information about security technique effectiveness and costs. At least the ranges, the expected values, and the formulas or methods for making quantitative estimates can be given.

If we cannot do this, then we really don't know much about the subject, and should not write about it.

One cannot be expected simply to implement the entire list of suggested ideas. That would cause the cost budgets to be exceeded. The cost of security might easily be greater than the value. It is rarely any system user's objective to maximise security at any price. There is a different value in having certain degrees and types of security in any given environment, and the design must reflect this. In short, we need help to make cost-effective security design and we seem to be getting security maximisation criteria. In addition, I am sure that

certain combinations of otherwise good techniques might destroy each other's effectiveness; "interference" or "thrashing" are well known concepts. So we must get more information about the combined effectiveness of particular techniques.

Before deciding on a set of design ideas for security, it seems to me logical to clarify our security goals. The table below is an example of a detailed "explosion" of such a goal specification which we made for a London bank project. It is a first draft attempt by the bank's own system designers, but it is a lot clearer than their initial attempt, which did little more than give lip-service to the importance of security.

This specification gave us a clear background against which we could evaluate the entire set of proposed security tactics. No more than necessary, but no less either. At a higher level of planning the resource restraints of money, time and human effort are specified to restrain designers to a realistic budget. In a recent column (CW, April 26) I mentioned a kind of Ohms

law. Availability is a function of reliability and maintainability. There is a parallel relationship in the security area.

The system integrity is a function of the attack (or threat) degree and the effectiveness of security design. Integrity can be quantified as the probability of system survival (in normal intended state) in the face of a more precisely defined set of attack types. In the absence of any security technology, all attacks will succeed. The function of security technology is to prevent attacks from reducing system integrity.

Thus it is important, in evaluating any type of security technology, to know: Which classes of attacks is it capable of thwarting? What is the expected probability of a given security technique for thwarting a given class of attack? What is the expected development cost aspect of the security technique? What is the operational cost aspect of the proposed security technology? Which important side effects can be expected (for example in performance, portability, maintainability, reliability)? Which other security techniques will this interfere with, and how? Without getting reasonably good answers to these questions, we will be making blind decisions.

I should warn the reader that the above is a simplified description of even more rigorous analysis techniques which some would want to use, but my objective is merely to introduce the concept that security planning can and should be approached in a quantitative and systematic manner if we expect to have a high effectiveness/cost ratio.

This column is intended as a challenge to all writers, teachers, and consultants in the security area to try to quantify their knowledge for use. As this column is intended to make use of such advice to make continued intuitive attempts spread security engineering knowledge, and to apply it, attempts to introduce a greater degree of solid knowledge in the form of quantified estimates of costs and effectiveness of security technology.

Security is a most serious attribute of any system. To make security engineering a serious discipline.

ATTRIBUTE DESCRIPTORS	MEASURE	PLAN	WORTH	BEST	EXPLORE TO	NOTE
File Correctness	File audit program 1,000 sample	99.5%	99% OK	100%		Extensive Audit
Program Integrity	Distinct module outputs	100%				
Customer Data Confidentiality	Exposure cases	1 in 5 years			Data classes	
Disaster Survivability of System Components	Double location bomb	99% system OK in one month	90% in month	100% in 24 hours	Threat type	
Auditability	Ease of audit trail	Any trans trail in 5 mins	& (plan)	Any figure satisfying audit in 2 hours		
Active Aggression	Probability of success	50%			Internal staff Visitor Stranger	
Operator Error Threat	Probability of success	0.1%		0%

PROGRAMMER NOTES

Capturing the reader's interest

ALL newspapers, including Computer Weekly, assume that the headline and introduction to a story — usually extending to the end of the first paragraph — are the key to capturing a casual reader's attention.

However, they should not mislead the reader as to the detailed content which will follow. A delicate balance is therefore sought between overstating the significance of the story and just presenting the facts baldly.

Now that computers are once again attracting considerable attention from the mass media, such stories are appearing with increasing regularity — a first glimpse suggesting that major breakthroughs are being reported.

A (minor) case in point comes from the usually reliable pages of New Scientist. Under the headline "Computers Made Simple", the MVS system

reported: "A university course on programming based on a £600 personal computer has exploded the hypothesis that computers will always be too complicated for the non-specialist to control."

What, then, was at the heart of this breakthrough? A new end-user language, based on non-procedural principles? An intelligent software system, capable of guiding non-experts through the process of system implementation?

Unfortunately not, read on: "Professor Andrew Collin, of the University of Strathclyde's Department of Computer Science, claims 'virtually 100% success' in teaching students to write programs in the Basic language."

The article explains that the success of the course was in

providing a Commodore PET each student, rather than relying on conventional programming methods.

It also points out that the PET, held in low esteem by academics, as well as by "fairly rudimentary" compared with some programming languages.

Still, wouldn't it be nice if the opening remark was a little less extravagant? Less danger then of making either the informed or the informed reader.

Given the explosion of interest in computing, we now also suffer from the danger of overstatement in general, by comparison with which the New Scientist example will be a model of understatement.

SOFTWARE FILE

SNA users to get transparent CICS

WITH the release of the latest version of CICS, 1.4, IBM has met the growing requirement for users of Systems Network Architecture to interface linked CICS applications running on multiple host mainframes.

Systemsolve's sales up 60%

HALF year results announced by Systemsolve, the specialist ICL software and systems house, show sales up nearly 60% to £650,000 over the same period last year. The forward order book for systems development stands at over £500,000, of which over £130,000 is for export.

Significant growth areas include the company's Northern division and the Middle East. Following the completion of the first phase of a major development in Saudi Arabia, Systemsolve has formalised its agreement with its agent in Al-Khobar into a joint venture operation.

THE Numerical Algorithms Group's Mark 6 Fortran library is now available on the GEC 4000. Tested by NAG in collaboration with GEC and University College, London, the implementation is already used at 10 different sites.

The new facility, called CICS Intersystem Coupling, makes use of SNA's Advanced Communication Function to permit transparent resource sharing among any number of CICS systems.

This means that the user is unaware of whether he is accessing local or remote applications and files, the same commands being used in either case. Where for example a program on one machine requires data stored on another, no command changes are needed.

In addition to supporting remote direct access files and DL/I databases, ISC also gives local programs access to remote queues and applications.

CICS ISC was developed by IBM in the UK and its design was described last week by Peter Homan at a seminar held to celebrate the official opening of a major new building at Hursley, IBM's research and development centre.

The System, he said, depended on installing a dummy application program in the remote machine. This he described as a "mirror", containing ISC-specific code, which handled the link between applications.

The mirror programs have to be set up by a systems programmer, but according to Homan do not impose much overhead, consisting of no more than 200 lines of code. The overhead lies

rather in the path lengths, which lead to delays over the SNA network.

Homan, however, pointed out that the aim of a distributed processing design was to have frequently used applications and data installed locally, so that CICS ISC would only be used infrequently and the delays would be acceptable.

Cincom into applications

BEST known for its DBMS, Total, Cincom has taken its first step into the applications software market with a manufacturing control system for IBM installations also using Total.

Called Manufacturing Material Planning System (MMP), the software has been run on equipment ranging from the System 3 Model 15 to the 370 range and comes from a newly formed Cincom group.

THE text retrieval package Status, originally developed at Hursley, will be the basis of an information system being built by Lenco for the RAF's Inspectorate of Flight Safety.

The turnkey system, incorporating a Prime 350 minicomputer, will also include 600 Megabytes of disc and four Lynwood VDUs. The terminal equipment will be connected by fibre optic cables.

£100,000 op system contract

ZEUS-HERMES has been awarded a £100,000 contract by Mercon Radar to develop a general purpose operating system for the Locus 18 minicomputer. The contract follows a feasibility study conducted by Zeus-Hermes and is estimated at over 3½ man-years of effort.

Three versions of the operating system are being developed: one supporting the Locus 18 on line to the GEC 4070; a stand-alone version; and an online version.

The Locus 18, Mercon Radar's own minicomputer, is sold as an integral part of complete hardware/software systems for a variety of applications. Prerequisites for order-based, air traffic control, naval weapon system control, and simulation.

TI plug-in programs

A SOLID state plug-in library of programs for business decision making has been launched by Texas Instruments for the TI 58 and TI 59 programmable calculators. The ninth in a series, it is priced at £32.

Online library uses IBM formats, JCL

A NEW online library maintenance package for DOS/VSE has been announced by Westinghouse Management Systems.

Developed by Goal Systems in the US, it is unusual in using standard IBM libraries and JCL.

Most similar products, such as Ponvale/Online and Volle, use special library formats, partly to save disc space. Westinghouse argues that this detracts from performance, by incurring card image compression/decompression overheads.

The Goal product, called Promt, is by contrast specifically designed for high performance, while a further benefit of using standard libraries is that no conversion is needed when installing (or removing) the product.

Prompt updates both the source statement and procedure library online, no batch "job" being needed. It uses the same partition independent enqueue/dequeue mechanisms as Free/Film to avoid interference between concurrent updates.

It can be run either as a stand-alone system or under the Westi TP monitor. In stand-alone form, a DOS/VSE partition of around 70K would typically be enough to support four terminal users.

A strong feature of the package is its powerful editing facilities. It provides, for example, a "compare" command in split-screen mode which stops automatically on finding a difference between two books being compared.

It also provides an internal reader, allowing the cataloguing and automatic execution of Prompt commands.

Other features include an interface to Power/VSE queues and full protection of library integrity against system crash or hard wait while updating.

A natural complement to Goal's Free/Film, Prompt DOS/VSE is available for an additional £35 to existing Free/Film users. On its own, it rents at £50 per month, while both packages together are charged at £125. Corresponding purchase prices are £1,320, £1,880 and £3,250.

Under DOS/VSE, prices may be slightly higher. Westinghouse, however, expects that the package will still be considerably cheaper and faster than the corresponding VSE facility, ICCP. It should be able to support Prompt under VSE by about September.

The company also made clear that, while rental prices may be adjusted under VSE, users who have purchased Prompt, or any Westinghouse DOS/VSE product, will be upgraded to the DOS/VSE version at no extra charge.

If your system begins with handprint, why doesn't it end there?

ALPHA. The optical scanning system (hand reads Alpha Numeric Handprint).

Alpha is a new optical scanning system which reads your data as you type it. It's the only system that can read your data as you type it. It's the only system that can read your data as you type it. It's the only system that can read your data as you type it.

Meaningful names

SEVERAL weeks ago we had a hint concerning assigning "meaningful" names to George 2 modules from Ron Linton (left) computer operations controller at Manchester Polytechnic (Op Spot, April 28). In essence, he outlined the procedure involved in rebranding the modules in order to indicate their function to the operator. Since then Ron has contacted me with an amendment to the hint.

He said: "When I originally came up with that idea, we were on version 8E of George 2 and not the latest, 8G. The hint still stands, but the addresses of the input module, XKEY, and the output module, XKEY2, are different. They are now 788 and 785, respectively."

Linton

The operators started their training by taking the ICL 2903 appreciation course "which provided an excellent introduction but was a bit hard going because we were unfamiliar with the terms used."

"Machine time was limited to two half-hour sessions which were shared out among the 14 of us on the course – it meant that each of us got about four and a half minutes on the system."

The course was also at the

As I became familiar with eJob, I would remove the details from my file and replace them with details relating to another one. This rapidly improved both my operating and temper.

Cutting glare

Wrong level for many of the persons attending it:

"One operator with 18 months' experience - he was on the course because his DP manager had insisted - knew more about the subject than the instructor, but didn't say a word

RESPONDING to possible health hazards from operating VDUs, London-based plastic panel specialists Chequers Engraving has developed a product which it claims will reduce screen glare - which certain

"By way of contrast, there was a girl typist who had been told by her boss that an ICL 2903 was arriving in two weeks and that she was going to operate it. 'Oddly enough, there was also a DP manager on the course, and I was the only one who was not a girl typist,' says AUEW/TASS, 'have cited as a cause of visual fatigue among operators' (19 January 198).

It is a matter of fact that the product is a thin matt coating which is applied to the screen in the form of a spray.

No flats m

the system — a programmer: "It was lucky because at our site there was a programmer who was also an extremely good operator, and over a three month period he taught me a awful lot, and I didn't pick up too many bad operating habits."

He points out that training should be viewed as an on-going matter and stresses the need for Jermyn Industries in Sevenoaks, told me: "I really liked the people and the work at BACS,

HINT OF THE WEEK

When is he here to be

When jobs have to be cancelled under IBM OS

tenas to be seldom used", is how Colin O'Keefe describes the IBM OS monitor command, the subject of this week's hint.

According to O'Keefe, assistant operations officer at British Airways in London, the command is particularly helpful in the following situation:

MONUSNAME

"As a continual display of datasets is not usually needed, the monitor may be stopped as

O'Keefe points to a further application for the monitor command — setting up a dynamic display of jobs running on the system: "Firstly, you have to set up a display

Now most operators will click through the job control language listing produced at the end of the job to find out the status of the JCL defaults JCL.

"If the monitor command is entered before the job is cancelled, the status of all its data sets will be displayed on the screen when it terminates."

WHEN I visit an installation the operators sometimes wish to discuss some of the broader issues affecting operations staff, in addition to talking about their immediate working environment.

And chief operator John O'Reilly, whom I met at Astral Computer Services (CW, May 10) was keen to have his say on operators' unions — something which has cropped up from time to time in past Space Age.

Any complaints?

OPERATORS often complain that nobody listens to their points of view. Well, Op Spot, listening and Bernard Allen would like to hear from you.

Your letters should be sent to Op Spot, Computer Weekly, Dorset House, Stamford Street, London, SE1 9LU. Bernard can also be telephoned directly or

He told me: "Quite recently I had a student who found himself a job at an IBM site in Wandsworth, South London, and was on the verge of leaving until the operations manager stepped

"I was a bit fed-up when I first returned home because I thought I would be unable to find a job as an operator near my home. I was very pleased when I got my present position."

According to Derek Plincock, TOPS operations lecturer at Borehamwood College, it is not unusual for his former students to give up jobs in London because of housing problems.

All reasons for Fungus Computer Products' enormous success over the past two years. All Fungus sales and service personnel have a thorough understanding of the PDP11 series and the technical considerations necessary for a successful enhancement.

Proof of our success is the rapidly growing customer base in the UK and Western Europe, including industrial, commercial, hospital, university and Government establishments, who can confirm the benefits of the equipment and effectiveness of our support services.

Future prospects for Fungus are very promising, as would be indicated by the completion of yet another highly successful year of operation.

- 1 All prices quoted are exclusive of VAT.
- 2 Delivery on most products is 30 days, in some cases ex stock, contact your local Sales Office for confirmation.
- 3 Prices include delivery to any destination within the United Kingdom, excluding Northern Ireland and Eire.
- 4 Prices include 80 days return to depot warranty.
- 5 Maintenance contracts may be arranged on all products excluding LSI II compalib.
- 6 Prices for deliveries outside the United Kingdom are F.O.B. Leeds.
- 7 Educational and quantity discounts available.

PEOPLE AND EVENTS

Director of games firm

SPECTRUM Marketing has formed a new company to handle the growth of the computer games business which was launched when the first version of Chess Challenger was announced in 1977.

The company, Computer Games, will continue to use Spectrum Marketing as its trading title, and will move to new premises in Barking, Essex.

Marketing director of the company is Sid Heyda. He has spent six years with Ryanair, most recently as director of the office machine division, and has since worked for Currys. He will be responsible for the planning and administration of the UK launch of Spectrum's range of computer games.

President of EEA

The Electronic Engineering Association has elected John Sutherland as president and chairman of the council for the year 1979-80. Sutherland is managing director of Marconi Radar Systems, and a member of the Economic Development Committee for the electronics industry.

After joining Marconi in 1954, Sutherland worked in the research laboratories on wide band transmission of data and as manager of defence projects.

He succeeds D. W. Morrell, of Racal Electronics, as president of the EEA.

Charles Jones, a former field sales manager with Channon, has been appointed computer products sales manager for Sandhurst (Stationers).

Robin Adair has become manager of international licensee operations for Clacum Systems International. Since 1975 he has held the position of manager, Nordic countries, and was based in Copenhagen.

Kwan Seng Ng, formerly a service engineer with ITC, has joined Data Logic's customer engineering division to take up a similar position.

Unilever managers

UNILEVER Computer Services has announced the appointment of Michael McDonald as interactive services manager for the Southern region. He will be based at Burgess Hill, and will be responsible for the familiarisation and training of new clients.

McDonald was previously a market research executive for data and telecommunications systems with ITT Business Systems.

Martin Buckley has become southern regional sales manager for UCSL. Prior to this, he was a salesman with Burroughs.

Business planning consultant for the company's southern region is Sush Mathur, a former employee of Deloitte, the chartered accountants.

Robin Musham has been appointed vice-president of AVX, the subsidiary of AVX Corp which markets multilayer ceramic capacitors throughout Europe, Africa and the Near East. Prior to joining AVX, he was general manager of Sivign Electric. In his new position he will be responsible for all marketing and manufacturing at the company's Aldershot headquarters, where he will be based.

Malcolm Wood, formerly IBM's well known branch manager in Dublin, is heading Vydec's campaign in Ireland. The company has opened an office in Dublin, and is to launch its full range of word processing systems at the Computex '79 exhibition in Dublin from May 29-31.

OBITUARY

Tim Murphy

MANAGER of NCC Information Services, Tim Murphy, died suddenly on April 27. He had worked for NCC since its inception, and was responsible for setting up the Information Department, and creating the system with its online retrieval and thesaurus of computing terms.

John Spencer, formerly director of the publications division of Infotech International, has now been appointed director of education and training. He was previously a technical author with ICL. He succeeded by Jeff Foster as director of the publications division. Foster has worked for Infotech for two years, both in publications and special events.

Comedian Dore Bryen is pictured here presenting the 1500th terminal celebration cake to Derek Aspin, deputy headmaster of the Ovingdean Hall School for partially hearing children. The cake was made by Rosemary Owen and Doreen Stockdale, of Rediffon, to celebrate the production of 1500 R-range Rediffon terminals manufactured at the Peasehaven factory since April 1978. Dore Bryen made the presentation during her visit to Peasehaven who she met many Rediffon employees.

Muriya Pursins has become the manager of the Northern area for Metra-Lowndes Ajax. Before joining Metra-Lowndes he has been in sales for the past three years. Pursins was sales executive with Townsend-Sign Computer Service.

Gerry Palmer has been appointed general manager for information services with Giddings and Lewis Fraser. He was previously a systems manager.

HP presents visual aids for our visual age.

Now, with a few simple keystrokes, you can transform those hard-to-read computer printouts into clear, helpful charts and graphs.

All you need is a Hewlett-Packard Graphics Work Station. It's built around our 2647A Graphics Terminal, a highly intelligent yet moderately priced CRT that lets you plot tabular data as a bar graph, pie chart, linear or logarithmic line graph. All without writing any software.

For specially formatted data from your CPU, you can program the 2647A in BASIC or AGL, our high-level graphics language. (If you don't need all its features, you may opt for our lower cost 2648A.)

Four easy ways to get hard copy

Choose the output terminal that suits the kind of copy you need. For charts on paper or overhead projector transparencies, the 9872A Graphics Plotter changes four pens automatically and will give you up to seven colours.

With our less expensive model, the 7225A, you change the pens yourself. (A simple job.) But you still get the same high-quality vector plotting.

For high-speed graphics printouts, consider the 2631G which will also double as your

computer printer, delivering alphanumeric data at 180 cps. Or you can hook-up to our versatile 7245A Thermal Plotter/Printer, which provides vector-drawn graphs and charts in addition to raster graphics.

What comes out must go in.

With the 9874A Digitizer, you can easily convert things like photographs, X-ray films, maps, strip charts and engineering drawings into X-Y co-ordinates for your computer or for local storage in the 2647A Graphics Terminal.

And to simplify writing custom graphics programs, we've developed GRAPHICS/1000, a special software package that runs on the HP 1000 computer.

For more information about HP Graphics Work Stations contact your nearest HP Office, or fill in the coupon.

ANNOUNCING THE HIGH PERFORMANCE 16-BIT MICROCOMPUTER, MP/200.

THIS IS HOW FAST YOU CAN GO.

Speed and performance. These are the two features that give you the power of a mini in a 16-bit microcomputer. Our new microNOVA[®] MP/200 is the highest performance microcomputer in the marketplace.

Offering the flexibility of product line integration at multiple levels—board, box or fully packaged system—the MP/200 features fast instruction execution times with an 0.84 microsecond ADD and a full 16-bit hardware multiply in 4.9 microseconds. Standard and high-speed data channel (DMA) provides input/output data rates of up to 3.7M bytes/second. An enhanced NOVA[®] instruction set featuring byte operations as well as signed and

unsigned integer Multiply/Divide add to the MP/200's power.

The MP/200 is completely compatible with the MP/100 which means that all peripheral and interfaces are interchangeable. And the MP/100 and MP/200 feature the industry's broadest range of compatible field-proven software for program development and execution, including diac and real-time operating systems and high level languages such as Business BASIC, Extended BASIC and FORTRAN IV.

Function and economy. Or, high performance. Whichever your need, you'll find the best, cost-effective answer in the MP/100 or MP/200 16-bit microNOVAs from Data

General. The right solution for today with the growth for tomorrow. Send the coupon for complete information.

The UK's seats of learning could lead world in networks

BRITAIN will be leading the world with its universities computing network if current plans of the Computer Board and the research councils bear fruit.

That is the optimistic view of the head of the newly-formed Joint Network Team, Roland Roemer, who is now settling down to draw up detailed plans and pick the rest of his team.

The idea which the Computer Board (which buys all big university computers) and the Science Research Council have come up with is not for a master plan for a network — that would be dangerous to try to formulate at this stage, in Roemer's view.

Rather it is for an upward-compatible spectrum of facilities, involving a hierarchy of networks on national and local level and a range of processors from mainframes to micros.

This is something that is not being attempted anywhere else in the world, Roemer points out, adding: "Maybe nobody else would be so daft!"

The motivation for the scheme, he explains, is the increasing need of academics and researchers to rely on communications in getting their work done.

"You can't satisfy each department's needs on a single machine," he says. Pooled computing is already going on, using the Computer Board's two national centres in London and Manchester, and with resource-sharing within regions, with different packages held at different centres.

In addition to the national centres, there need to be both regional and local networks, and all three levels must be compatible and linked so that users are not restricted in what they can do by bureaucracy or lack of standards, Roemer says.

In particular, local area networks are especially important for the exploitation of micros in universities, as has been pointed out to the Computer Board by Jim Alty of Liverpool University.

A local network would have to be cheap, easy to interface with, and have a high bandwidth in order to enable users to pool their software and their special hardware to the greatest possible extent. An example of such a system would be the "ring main" developed at Cambridge (CW, March 15).

The difference between this scheme and all the networking that goes on in, say, the US, is

that there the networks carry largely terminal traffic.

The UK system will allow files to be transferred between machines, and jobs to be switched to a range of hosts.

The use of graphics over networks is something that is only just starting, Roemer points out, and this requires more elaborate communications than that used by simple terminals.

The principal obstacles Roemer sees in his path are: getting manufacturers to adopt standards, and persuading users to follow the scheme and not "do their own thing" by setting up facilities on their own. The first he describes as "very hairy", but it should be greatly helped, he thinks, by the Computer Board's decision to link standards to procurement (CW, May 25, 1978). The second is an ever-present problem in research centres and universities, where

UK universities could have a system of computing networks unique in the world in its power and versatility if current plans of the Computer Board and the SRC bear fruit. Guiding developments is the new head of the Joint Network Team, Roland Roemer, who talks to Rory Johnston.

"not invented here" is a common syndrome.

To start with, the team will have three basic duties. One, to participate with the various centres and institutions in their planning, taking a global view, and trying to influence rather than dictate.

Two, ensure that communications and switching facilities are made available, both on a national and a local level.

On a national level this would involve liaising with the Post Office over PSS, leased lines, and whatever. On a local level it means looking for standard products from manufacturers and encouraging their development. An example would be the Cambridge ring main system.

Three, obtain standard equipment for attachment to the network, by placing development contracts with systems houses and universities for instance, and by members of the team contributing to development themselves.

By and large the team will arrange for technical work to be done by other people, but it will be important for them to do some practical work just to "keep their oar in". Roemer thinks, "Co-ordinate, participate, stimulate," is how he sums up the team's function.

The user interface is one topic he is particularly interested in. One will have to be developed that is "user-friendly", he says, unlike, for instance, EPSS.

How will a user get himself connected to a machine at the other end of the country without having to type in 14 digits? That is the sort of problem Roemer is thinking of. He would also like to develop machine-independent command sets.

Another important job for the team will be helping people test and validate their systems. For this the team will need some hardware of its own and a central set of testing procedures.

For local area networks, the work most needed to be done at the moment, in Roemer's view, is development of concentrators and gateways to the outside world.

Looking at his work as a whole, Roemer says: "We need to keep a sense of proportion. We can't have a very complicated arrangement just to connect a micro to a campus network."

It is this task of being all things to all men, of seeing that simple facilities are provided for some users and very sophisticated ones to others, while keeping the whole thing reasonably coherent, that promises easily to occupy all of Roemer's time for the next three years.

At present he is ensconced on his own at Rutherford Laboratories, where he first got involved in DP as a high-energy physicist in the sixties, and was in the now-superseded network unit under Mervyn Williams.

He has no staff as yet apart from a secretary (five more professionals are to make up the team) nor does he have a boss, which has its compensations as well as its drawbacks. "I have several shoulders I can cry on."

He has a peripatetic existence, living in Wimbledon and singing in a choir in Hampstead, where he rubs shoulders, purely by coincidence, with other leading lights of the computer world such as Andrew Hinchley of the ACM, several civil servants from the OoL, and even a staff writer on Computer Weekly (a crowd Malcolm Peck describes as "the Hampstead Mafia").

The small, select world of computing is getting larger, and Roemer's efforts should make it much easier for them to talk to each other.

Dons' concern over heavy use of university centres

A REPORT on the future needs of the national university computing centres is expected to be completed by the summer.

The National Centres Working Party, under the chairmanship of Professor Roger Elliott of the Oxford University Department of Theoretical Physics, has been set up by the Computer Board following widespread concern over the heavy demands that are being placed on the computing centres at London, Manchester and Newcastle. London presents a particular problem since the CDC 8600

Comet designer Borg Christensen demonstrates his brainchild to Bulmershe College's Roy Atherton.

Next IBM 4300 to be a field upgrade

● From front page

there will still be long delivery delays on major products."

So although IBM has folded-up the so-called price umbrella from the industry by cutting hardware prices to the bone, it has in effect replaced it with a "demand umbrella".

This protects both plug-compatible and rival manufacturers since, in the case of the former, if they can ship something equivalent to a 4341 in a month or two, whereas the IBM machine may be on 18 months delivery, they have a distinct advantage. In the case of companies like ICL and Burroughs, earlier delivery should be sufficient to persuade many customers thinking of defecting to IBM to stay loyal to their existing supplier.

Orlansky reports that in Europe, orders for the 3031 have proved very "soft" with substantial numbers of customers converting them to 4341 orders. Chairman of the IBM Computer

Users' Association Des Lee predicted that this would happen at the time of the 4300 announcement (CW, February 8).

Another problem IBM is facing is that the enormous demand for outright purchase rather than rental of large systems has fallen away, according to Orlansky, and although orders are still well up to plan, outright sales are well below forecast.

In the past two years, IBM bolstered profits considerably by achieving high levels of sales, so the unexpected saving back to rental is likely to impact its figures. The company is now faced with a dilemma: should it cut prices further on the 3031 series to boost outright sales, or will this lead to even more overall demand, pushing delivery dates out even further?

Andahl is at present benefiting from IBM's comparatively high 3030 series prices, but longer delivery delays from IBM would tend to drive more business Andahl's way.

Reducing threat to firms from natural disasters

FIRMS worried about serious harm to their business caused by a natural disaster hitting their computer centre will soon be able to make provision for back-up facilities from US firm Oota Processing Securities for a flat rate of \$12,000 a year.

OPS is building six "recovery operation centres" around the US, each consisting of enough room for three large IBM computer systems together with room for data preparation, data control, and programming staff. Each building will have air conditioning, power supplies, and communications facilities; everything, in fact, apart from the computer itself, which would be brought in on lease at short notice.

Subscribers who have special hardware such as cheque sorters or OCR readers that could not be obtained at short notice could install back-up units at the centre if they wished.

According to Louis Scoma, OPS president, 80 firms have

already signed letters of intent to subscribe to the first centre, now under construction in Fort Worth, Texas.

He points out that what many firms do, namely arrange to share another's machine in the case of mishap, is fraught with dangers as there is often insufficient capacity on the other machine and also compatibility problems.

What makes the PACE Exhibition so special?

- Devoted exclusively to Peripheral Hardware.
- A great way to get back into business after summer holidays.
- All the facilities of a top-class hotel.
- New products, the latest design and ideas.
- Trade only — (let us tell you the right people).

Why programmers are in short supply

THE only way to become proficient in programming is to practise it. If this is the criterion of a craft, then, as Jonathan Hamilton suggests, programming is a craft (CW, April 19).

To extend this thinking to the necessity for a five-year apprenticeship is, however, going a bit far. Has it ever been demonstrated, in any case, that five years is actually required to master any of the more traditional crafts?

An apprentice is traditionally an underpaid dogbody, and no one with the ability, and the will, to become a good programmer is ever going to be content with that — a difference, possibly, between those inclined to manual skills and those inclined to mental skills?

Before continuing along this theme, I would like to answer one of Mr Hamilton's questions, why the present shortfall of programmers is so large. This was explained in Hansen and Penney's and the two reasons given there still hold good.

The shortage originates in the financial squeeze of 1971; employers simply stopped taking trainees, and it was some years before even a minority were prepared to recognise their error.

Teaching the techniques of DP

MAY I be allowed to comment upon what appears to be some misconceptions in "Getting into Computing" (Focus, May 3).

Entry into computing is not easy, nor should it be if entry standards are high: on the other hand, the government is spending vast sums of money to provide just the opportunity which your article implies does not exist. The scheme which we operate for the Manpower Services Commission in London and Glasgow provides 20 weeks of intensive induction training in systems analysis, business principles and basic/advanced programming.

In this period, one can "teach" the techniques and "educate" to an appreciation of professionalism, which for this purpose I

provide the training. That is available in the polytechnics and colleges of further and higher education — although, as I am suggesting, not in the right mix of college and industrial periods to attract the school-leavers and satisfy the need.

What the government, NCC, and the professional bodies should provide is precisely what they do provide: funds, training material and syllabuses respectively.

As to which professional body, Mr Hamilton only mentioned the ECS. Since we agree that the graduate level is not appropriate, then neither is BCS membership.

Interested employers and students will find the relevant syllabus with the other computing professional body.

GEORGE PENNEY, Chairman, IDPM Education Committee.

1. Job Trends in Data Processing, P. Hansen and G. Penney, NCC Publications 1976.

NCC or a professional body to

take to mean having a pride in one's work and striving to be of the best. Our success in this field can be judged by the way data processing managers are prepared to participate in the scheme and accept our graduates on their payroll — we are normally in an over-subscribed position at the end of the course.

The real problem, I suggest, lies elsewhere. It is the geometric expansion in the data processing industry to a point where there just are not sufficient educationalists available to cope with demand — it's all a question of standards, you know.

ROBERT MOSCROP Education Director Allan D'Morais and Associates (Scotland).

Success of Honeywell Page Printing System

YOUR report referring to Univac's decision to market the Siemens laser printer (CW, May 3), and stating that this printer "... remains the only effective competitor for IBM's 3800 laser printer", is strangely at odds with the current success of the Honeywell Page Printing System.

A number of major UK companies have installed or ordered the PPS and during the course of this year the Honeywell system will be going into sites previously the sole domain of Univac, IBM, Burroughs and ICL equipment.

To us at Honeywell (and to

IBM and Univac too, we would guess) that makes the Page Printing System very competitive indeed!

JOHN MacDONALD Director, PPS Marketing Honeywell, Brentford.

THE EDITOR welcomes letters commenting on subjects published in Computer Weekly, or on original topics. All letters must be accompanied by the writer's name and address, not necessarily for publication.

The NEB cracks the whip

AS majority shareholders, the National Enterprise Board cracked the whip on Monday at an extraordinary shareholders' meeting of Data Recording Instrument and called for the joint venture with CDC for a disc drive plant, to be given approval to go ahead (CW, May 10).

The plan for an £8 million injection of NEB cash to fund the project had been opposed by Grundy of Teddington, which had founded ORI in the 1950s, because it considered it to be an unsound venture.

The NEB now has approval for the deal, but Grundy's move to block it has still to be heard by the Appeal Court and the date of that hearing has yet to be set.

ICL for Linesman

SOFTWARE support and bureau services for RAF West Drayton's Linesman computer system, which monitors air traffic conditions in UK air space, are to be provided by a recently installed ICL 2050.

DATA GENERAL CORPORATION

OFF THE SHELF...

We have stocks of microcomputers, boards, chips, printers and VDUs on our shelves ready for immediate delivery. All the components of a complete low-cost 16 bit micro-computer system, made by one of the world's leading computer companies. Also readily available our team of experienced microprocessor engineers ready to give advice on applications, installations and software. We offer a unique opportunity to purchase a proven 16 bit computer system off-the-shelf today — phone Reading 585171 for details today.

THE CITY UNIVERSITY BUSINESS SCHOOL

COURSES IN SYSTEMS ANALYSIS 1979/80 DIPLOMA IN SYSTEMS ANALYSIS

This is a full-time one academic year course for data processing professionals who wish to broaden and improve their practical experience and theoretical knowledge of systems analysis. Candidates with suitable experience need not have a first degree. It may be possible for successful students with appropriate qualifications to convert this Diploma to an HND by means of a part-time project and dissertation.

MSc IN BUSINESS SYSTEMS ANALYSIS AND DESIGN

This is a full-time one academic year course for graduates for other suitably qualified individuals with data processing experience. The course provides a comprehensive academic and professional grounding in systems analysis and design that combines the practical demands of work in this field with the theoretical knowledge required for research and development.

Further information of these courses is available on request from: **Systems Analysis Department**, The City University Business School, 100 Brook Street, London W1P 2PS. Tel: 01-477 6677.

MYRIAD PROGRAMMING MANAGER

BUCKINGHAMSHIRE

To £10,000

This position offers a career-minded technician an excellent opportunity to lead an expanding department of an international organisation. The Programming Manager will be responsible for the development of all company software products, ensuring technical standards are adhered to and that full documentation is produced. Maintaining strategic planning schedules within the group for individual projects, the person appointed will monitor progress and produce regular reports for the Managing Director. In addition to technical activities, the Programming Manager will be responsible for all recruitment and personnel development within the department.

The Company offers a full range of employee benefits, including generous relocation expenses where appropriate. Located in an attractive area of rural Buckinghamshire, the spacious new offices have ample car-parking facilities and are well serviced by public transport.

Candidates for this challenging role should have a strong data processing background and proven experience of motivating and controlling a small team of programmers in a demanding environment.

An in-depth knowledge of IBM ASSEMBLER, DOS and DOS/V is essential, as is the ability to recruit technical personnel at all levels.

The successful applicant will possess a genuine software development, coupled with the drive and personality to manage a fast growing department.

OPERATING SYSTEMS RELIABILITY ANALYSIS

NEAR MANCHESTER

£8500

Two positions exist for people keen to specialise in the field of large operating systems resilience and reliability.

Joining one of the foremost consultancy teams in the country, the successful candidates will have the opportunity to play a significant role in the analysis and design of major operating systems software. Simulating and monitoring operational conditions they will audit major installations with the aim of improving the systems reliability and resilience.

Candidates should have a sound background in software programming with detailed experience in large operating systems. The main area of activity will be in VME/B although expertise in OS would also be relevant.

The company offers an excellent benefits package and relocation assistance where appropriate. A good commencing salary is further enhanced by first-class career prospects and the opportunity to progress at the forefront of technology.

Ref. E1/2405

COULD YOU EARN £20,000+ JOIN OUR CLIENTS SUCCESS STORY

C. LONDON

SALES EXECUTIVE

Successful people, and organizations, rarely achieve such prominence by accident. They share an enthusiastic drive and sense of purpose, and they have an ability to react to the market pressures at both an individual and company level. Organisations achieve sustained success by providing an environment in which professionals can rapidly develop to their greatest performance. The really outstanding individuals recognise such an environment and take advantage of the opportunity to become part of it.

This vacancy, presents a singular opportunity for success today in a front-line sales role. Our client is a major hardware manufacturer and market leader. In itself this fact is a testimony not only to the unrivalled range of hardware products which they offer, but also to the success of the sales force and sales support effort, which leaves front-line sales personnel free to carry out their primary responsibility — opening up new accounts and developing existing clients.

To capitalise on the ever-increasing demand for its products the company is currently expanding its sales team and is able to offer a number of exceptional opportunities to experienced salesmen in Central London.

Ideally candidates should have a successful background in hardware sales although applications from candidates with proven sales experience in software products or computer services will also be considered.

A substantial basic salary is offered plus generous commission and a company car scheme. Successful candidates will receive full training in the company's products and have the opportunity of realistically achieving earnings well in excess of £13,000 in their first year of operation with ample scope to earn £20,000 per annum and more.

Data General

*If you're as good as me,
Come and join me! Fred*

Operations.

Location: Rural West Yorkshire.

A chance to join progressive Computer Service Bureau.

Established as one of the leading Computer Service Bureaux in the North West, and a member of a prominent financial group, our client provides a comprehensive data processing service to their parent group of companies and a wide range of external users.

Their continued growth has created the following vacancies in the Computer Operations department where facilities include Univac 1106 and Univac 1108 hardware with extensive communications network.

Operators.

**Team Leader and Senior Operator level.
Salary up to £8000 p.a. + 80% shift allowance.**

We are looking for experienced operators with the ability to hold responsible positions in the team. If your experience includes Univac 1100 then so much better, but we would also like to talk to you if you have either an IBM or Burroughs background - Either way, you should have worked in a Real-Time/On-line environment. Ref. MB/2471.

Operations Support.

**Salary up to £6000 p.a. basic
(could be days only or shift work - whichever you prefer).**

These positions will appeal to Operators who want to broaden their scope; programming or systems people who want to apply their experience in a completely new area; and those of you with previous or current experience in a similar role who feel like a challenge.

You will be directly involved in all aspects of support, including systems implementation, problem solving, performance monitoring and evaluation. Ref. MB/2479.

Based in extremely pleasant rural surroundings, the company offers excellent working conditions, 4 weeks holidays, regular reviews, formal training and a generous relocation package.

For further information and immediate action, please contact Marilyn Black on 01-828 2115 or 01-828 5356 (24 hour answering service).

Field Service Engineers...
"IF YOU'RE AS GOOD AS ME,
YOU'LL DO AS WELL AS ME"

"I'm Fred.
That's not my real name... or me in the picture. I'm doing
this incognito because my management reckon
the competition would soon snap me up. Or at least try to.
"But I can tell you this. I joined Data General as a Field Service
Engineer only two years ago. Already, like 50% of the team who joined at the same time,
I've had substantial promotion. I came into management. Others went into support.
The company's growing that fast!
"If you reckon you're good, come and join me. All you need is the experience
or the potential to trouble-shoot to systems, unit or component level. It's tough work, but worth it.
"You'll be joining one of the world's foremost computer companies and working on
state-of-the-art equipment. Personally I reckon their systems are second to none.
"Pot the black and win the game. Men or women phone Tony Peacock our UK Field
Service Manager on 01-841 5151... or write to David Daley, Personnel Manager at the address below.
"Data General is where the action is. And it's good!"

MYRIAD ANALYST/ PROGRAMMER

S.W. LONDON c.£5500

This position presents a good career step for an Analyst/Programmer seeking additional responsibility, or a Senior Programmer who wishes to progress towards analysis.

The Company has recently made a major upgrade in machinery with the installation of a dual 3 Mb ICL 2900 VME/B configuration and has a countrywide telecommunications network. The Systems and Programming team work to professional standards and the Company provides formal training to all members of the department.

The successful candidate can look forward to taking total responsibility for a number of interesting applications, involving user contact at all levels.

Applicants should be self-motivated with sound COBOL programming experience, preferably on ICL hardware, and a background in financial and commercial systems.

Benefits include Pension Scheme, Flextime and 4 weeks holiday.

UNIVERSITY COLLEGE CARDIFF

LECTURER COMPUTING MATHEMATICS

Applications are invited for the post of Lecturer in the department of Computing Mathematics. Candidates should have a first or good second class honours degree in Computer Science, Mathematics, or a closely related discipline, and be actively engaged in research. Applications will be welcome from candidates whose research interests are in any branch of computing.

Salary £1232 - £8462 p.a. The appointment will be made in the lower end of the scale. Duties to commence 1st October, 1979.

Applications (2 copies), together with the names and addresses of two referees should be forwarded to the Vice Principal (Administration) and Registrar, University College, P.O. Box 78, Cardiff CF1 1XL, from whom further particulars may be obtained. Closing date 21st June, 1979. Reference 1802

THE EASTBOURNE WATERWORKS COMPANY

PROGRAMMER

Applications are invited for the above position in a progressive installation using an NCR Century computer with 96K discs and on-line facilities. Applicants must have Cobol programming experience. Salary will be up to £4,500, depending on age and experience. The job offers an interesting variety of work in a unit undertaking a wide range of applications, and other benefits include a 34½-hour week, up to 4 weeks annual holiday, life life insurance and a contributory pension scheme.

Write or telephone for an application form to Mr. R. E. Welton, Data Processing Manager, THE EASTBOURNE WATERWORKS COMPANY, 14 Upperwood Road, Eastbourne BN21 1BP. Tel: Eastbourne 21371.

Systems Programmers

MVS Development/IBM 3031

Control Data is one of the world's largest Data Services organisations supplying scientific and commercial DP services through batch, RJE and timesharing on Control Data and IBM machines connected through an international network. As part of our rapid European expansion we are in the process of installing 3 additional mainframes including an IBM 3031 at our UK Data Centre alongside our existing 360/85. The 3031 will run MVS with JES2, TSO, VTAM/NCP, RACF and SPF and will be connected to our extensive US and European Data Centres through Control Data's own network software.

If you are an experienced systems programmer with a minimum of one year's experience under OS or VS operating systems you could help install, maintain and develop these complex new systems.

Whilst this job is located in

North London /South Herts

you would also be working with our development laboratories in California and IBM in order to provide the latest available software in a challenging environment.

A salary of

Circa £8200

is envisaged as well as the usual large company benefits plus exceptional opportunities for career development in a large worldwide organisation dedicated to the computer industry.

For more information call: Marilyn Doff on 01-440 5161.

CDC Data Services/UK, a division of Control Data Ltd.,

MORE THAN A COMPUTER COMPANY

Computer Engineers

First we fly you
to the States
for training
then you take off
with a great
new product
Honeywell

As an experienced Computer Engineer you already know about Honeywell's new concept in computer printing: PPS - the first total printing system, non impact, ten times faster than conventional printers.

PPS is a system in its own right. Built around a Honeywell Level 6 microcomputer, operating off line it can accept output from ICL, IBM, Univac, Burroughs as well as our own mainframe computers.

It's the sort of major breakthrough Computer Engineers dream about getting their hands on. We're offering that opportunity to a few select Computer Engineers. It's the chance to become a Customer Engineer in tandem with our top sales people and be a vital link in the technical presentation of a revolutionary new product - you will have been educated to OLC/HNC or equivalent, with at least three years in microcomputers and an above average electromechanical aptitude. We'll supply you with the specialist technical know-how by sending you to Phoenix on a training course.

An attractive salary is offered, together with a company car and a full range of benefits. No doubt about it, PPS, plus your own initiative and drive will quickly place you among the elite in the customer engineer market. Vacancies exist throughout the UK.

Please telephone or write to Garriek Fraser, Honeywell Information Systems Limited, Honeywell House, Great West Road, Brentford, Middx. Telephone 01-869 9191 ext. 382.

JBA

Operating Systems Specialists

Germany £20,000 - £30,000
Several of our clients still seek operating systems expertise, preferably with a variety of machines, viz IBM, DEC, UNIVAC, CDC, etc. Work involves the design, program, test and installation of virtual machine operating systems and support software. The ability to design and implement software for an OS/MVS-type operating system is particularly desirable. Programming is in assembler and high level operating systems languages. JBA would like to talk to anyone involved with operating systems, even post-graduates involved in research or similar. Contact: Mike Creamer

Prestel/Viewdata Specialists

Germany from £20,000
Immediate vacancies exist for consultants who have considerable experience of information transmission systems, such as Prestel, Viewdata, etc. Data communications expertise and database knowledge is vital to the positions, particularly where concerned with large mainframes and front-end processors. A user contact background is desirable. Our client is one of the largest consultancy organisations in the world with over 3,000 employees. On this solid foundation, the company offer real up-market remuneration packages and excellent relocation assistance. Further, the prospects of continuation of projects at very senior levels in a worldwide market place is virtually second to none. Contact: Mike Creamer

Education Consultant

London based Start c. £8,000 + Car
A background in education and training is NOT essential for this position, although an interest in these areas of d.p. is naturally assumed. Pre-requisites are maturity, sound all-round computing experience (both technical and commercial), and the ability to deal with and advise managers and technicians at all levels. Our client is the market leader in Video Assisted Instruction, a method used by over 200 U.K. customers for their D.P. and Management training. The appointee will be responsible for clients in the South of England, providing advice and support and helping to develop their training programmes. The rapid expansion of the training field in computing, together with the outstanding growth of this company both ensure excellent career prospects for an ambitious individual. Contact: Andy Wright

For further information on any of the above vacancies, please contact the appropriate consultant.

If your qualifications do not match the above positions but you are seeking other opportunities please contact us anyway.
JAMES BAKER ASSOCIATES, International Personnel Consultants,

A.G.U., a medium-sized and expanding organisation which undertakes systems analysis and programming services for major German companies, has vacancies for

APPLICATIONS PROGRAMMERS

who have at least 5 years' programming experience and a working knowledge of a sophisticated operating system. Applicants should be ready to acquire a basic knowledge of the German language.

The successful candidate will receive a salary of £14,000 per annum (plus travel expenses).

Please write with full details of your qualifications and experiences to Dr. Hannes Hopmann at

A.G.U. Arbeitsgruppe für Unternehmensberatungen c/o
Emmuel-Leutze-Str. 17, D-4000 Düsseldorf 11

UNIVERSITY OF LIVERPOOL DEPARTMENT OF PHYSICS

GENERAL ASSISTANT

Active and intelligent person, preferably over 30, to assist generally with running Department's computers. Training provided as necessary. Normal hours of work 9.00 a.m. - 5.30 p.m., Monday-Friday. Salary within range to £3,032 p.a.

Application forms may be obtained from The Registrar, The University, P.O. Box 147, Liverpool L69 3BX to whom they should be returned as soon as possible. Quote ref. RV/587/CW.

UNIVERSITY OF SUDBURY DEPARTMENT OF MATHEMATICS

LECTURER IN MATHEMATICS (COMPUTING SCIENCE)

Applications are invited for a lectureship in Mathematics (Computing Science) in the Department of Mathematics. Applicants will be expected to hold a good honours degree in Mathematics or Computing Science and have at least three years' relevant post-graduate experience. Some teaching experience would be an advantage. Applicants should have an active research interest in one or more of the following: Computer Aided Design, Combinatorial Computing, Computer Graphics, Microprocessor Operations, Research or Optimisation. The person appointed will be expected to engage in teaching and research. Salary will be within the range £4232 - £8462 per annum (1978-79) according to qualifications and experience. Further particulars about the post may be obtained from the Academic Registrar, P.O. Box 147, University of Sudbury, Guildenham, Suffolk CB2 1PQ. Telephone 0462 71281. Applications from men and women in the form of a completed application form, together with the names and addresses of two referees, should be sent to the above.

FIELD SERVICE ENGINEERS

NEW OPPORTUNITIES

£6,500 + Overtime + Standby + Car + Training
New opportunities have arisen in LONDON & MIDLANDS as a result of expansion by a highly successful British Systems Company.

The young and dynamic company offers you the chance to develop your career in microcomputers at the very top end of the market.

Even if you are not looking for experience in microcomputers and want a stimulating environment with real prospects for future advancement and feel that you can handle the above challenge - call now.

Executive Selection Consultant

London Remuneration to c. £10,000

This appointment will be of interest to management services professionals wishing to move into a new and highly rewarding career in data processing executive selection consultancy.

BIS Applied Systems Ltd is a major international management and data processing consultancy organisation and a member of the British owned Business Intelligence Services group of companies with a turnover approaching £7m. The Executive Selection Division, a recognised market leader in the selection and placement of management services and data processing professionals wishes to appoint a suitably experienced DP professional able to make a significant contribution to the long term growth of the business and its administration.

The successful applicant will be closely involved with a wide range of clients in the development and management of DP staff recruitment projects on their behalf.

You are experienced in communicating with management at all levels, and knowledgeable of the problems of controlling the development of data processing from the user and the DP viewpoints. You should possess the abilities to evaluate individual performance, motivation and potential against specific requirements, and to present your views clearly and concisely, in oral and written communication at high level. The successful applicant will be offered a remuneration package to around £10,000, and the opportunity to establish a rewarding and satisfying career path in an expanding organisation which is geared to promoting on merit, ability and personal contribution. A range of benefits includes a company car scheme. In addition, opportunities will be provided to work on consultancy assignments in the management consultancy division in order to maintain up to date DP industry knowledge.

Please write briefly and in complete confidence to ANTHONY SPURR, Executive Selection Division, requesting a Personal and Professional History form, quoting reference G726, at the address below. Applications from either sex.

Up to £8,800 p.a. + benefits.

A Computer Operations professional is required by an established international company to be responsible for the day to day running of their computer room activities.

This position will use to the full your administrative, technical and management abilities for you will be responsible for controlling, motivating and providing technical guidance to an operations section of 10 people.

Their data processing is centred on an in-house IBM 370/125 under DOS/VS and POWER/VS with links to an IBM 370/158 MP under MVS/JES 3 at a European location. It is, therefore, essential that you have worked in both DOS and OS environments. At least six years' operations experience including supervisory responsibilities in a medium/large IBM 370 installation is required and it is probable that you have also received some formal management training.

As you can see, the demands are high but then - so are the rewards, as there is ample challenge and opportunity.

If you are aged between 25-35 years, professional in appearance and manner and have the desire to succeed, then you will enjoy and appreciate this environment.

Based in a pleasant area of London, the company offers a starting salary of £7800 p.a. - £8300 p.a. London Weighting Allowance (at present £548), Luncheon Vouchers (£1.05 per day), a very good contributory pension scheme, BUPA and four weeks holidays. Ref. 2328CW.

Please apply to Marilyn Black on 01-828 5356, who will be pleased to arrange immediate interviews.

DEC Senior Systems Programmer

Croydon

The Scientific Division of ISA-UK provides a service to the scientific and engineering community within Philips Industries via a timesharing and scientific batch processing facility. This is based on a B12K DEC 2060 coupled to an extensive communication network including synchronous links to two IBM mainframes.

We are looking for a Systems Programmer, man or woman, to join a small team which has total responsibility for the systems software. You will be mainly engaged in developing both major and minor enhancements and facilities in the systems software to meet our users' requirements. You will also advise management on new hardware and software installations, as well as implement, test and maintain manufacturer's software releases.

Ideally, you should have a degree or equivalent in science or engineering, but the main requirement is for considerable experience on large timesharing systems

which will include at least two to three years' system programming on DEC-10 or, preferably, DEC-20 equipment. Your programming experience will have given you complete familiarity with MACRO and at least one high-level scientific language.

If you are currently earning £6,000 or more p.a., this opportunity will interest you, with benefits which include five weeks' holiday, pension scheme, discount on company goods, and relocation expenses. Longer term, there are opportunities, if you wish, to diversify your computing experience, or to broaden your career in a large company with progressive staff development policies.

Please Mike Endacott on 01-888 7766 if you would like to discuss details, or contact ISA-UK Personnel Department, City House, 420-430 London Road, Croydon, CR9 8OR. (phone 01-888 2186 ext. 28).

Changing your job?

You should look before you leap.

Confining yourself to one environment can be dangerous. If anything goes wrong, there's no going back and no room to move sideways. You just have to cut your losses and start again.

Unless, of course, you confine yourself to Altergo. In our organisation there are many opportunities, and if one doesn't suit you, another one will.

As the UK's leading independent computer consultancy — with product sales worldwide currently increasing at about 100% a year — we can offer ambitious and dedicated men and women like the following, an unrivalled degree of career choice and unlimited opportunity for career development:

• PL/I programmers • IMS programmers
• Systems programmers • RPGII programmers
• COBOL programmers • TP programmers
• Analysts • Systems consultants

You can specialise or diversify. You can commit yourself totally to technical development, or concentrate on

user liaison. You can travel or stay where you are. You can devote yourself to ever more advanced practical applications or move on to management.

Our international service offers you an almost endless variety of industrial and commercial situations to work in. Our first-class practical and professional training will widen both your technical and business horizons, and regular open discussions will make sure that you always move in your chosen direction and nobody else's.

Your career is your own at Altergo: and you make your own success — but we reward you for it. From the very beginning we'll pay you what you're worth — not just in terms of experience, but in terms of potential as well. Regular reviews will ensure that your salary keeps pace with your contributions to our profitability, and an annual bonus will show you how much that contribution is appreciated.

Contact Roger Perkins or Jacquelyn Clark quoting AP/50, Altergo (Personnel) Limited, Warwick House, 38 Soho Square, London W1V 5DF. Tel: 01-734 9681 or 049-481 2713 after 8 pm.

SOMERSET

SYSTEMS MANAGER DESIGNATE

Reg. to £8,800 p.a. Salary reviews after 3 months and on 1st October

Our clients are a national brand food and have been supplying the Electronics/Electrical industry for over 55 years. They have created a new position of Systems Analyst at their central manufacturing and administrative control based in Somerset. Their present network comprises 4 VDU's, located in User departments, on line to a PDP 11/34 under RSTS/E and it is expected that the core and disk access will be increased by 50% this year. The successful applicant will be required to develop a close working relationship with the user departments, design and implement new applications systems as well as supporting the existing software. It is envisaged that this person will be promoted to Systems Manager within two years as the department increases in size and capability. Ideally you should have a broad knowledge of commercial systems, preferably gained within a manufacturing environment coupled with programming experience in BASIC on minis and/or a time sharing network. Alternatively your background may be programming in BASIC +, be familiar with DEC operating systems and have had some involvement in the implementation of a major system. Close to the Mendips Hills the location offers some of the best recreational facilities in Britain whatever your interests may be. House prices are well below the national average for example 3-bed maisonette £13,000, 3-bed detached requiring modernisation £9,950, 3-bed bungalow £16,000. GENEROUS RELOCATION ASSISTANCE is available. This is a rare career opportunity for only progression into true management. For further details ring 0272 21 1035 or write to ATA Computer Recruitment, 36/38 Baldwin Street Bristol 1.

MYRIAD

DATABASE SYSTEMS SYSTEMS ANALYSTS

C. LONDON TO £7500

Variety, challenge, responsibility and real career potential; this post is with a fast expanding bureau marketing a comprehensive range of time-sharing applications utilising powerful database and transaction processing software.

- * EXTENSIVE TRAINING
- * VARIETY OF SMALL PROJECTS
- * CLIENT LIAISON
- * DESIGN DATABASE SYSTEMS
- * ON-SITE IMPLEMENTATION

Candidates will possess a strong, commercial D.P. background and have the personality to function in a customer-oriented environment. They will have been involved on at least one major project from inception through to full implementation.

Rapid promotion is a very real prospect for the successful applicant together with increased responsibility and rewards. Ref: S3/2405

CROYDON PROGRAMMERS ANALYSTS TO £6500 TO £8000

Our client, a major International Organisation is seeking Programmers and Analysts to join an expanding professional team providing additional and more advanced computing facilities to user groups at home and abroad.

The successful Programmers will be required to develop and enhance corporate applications encompassing Assets Register, Job Costing and Financial Planning in a real-time environment. The Analysts will be able to take responsibility for the development of Distribution and Sales Forecasting Systems.

It is envisaged that Programmers will have 2-3 years' COBOL experience and/or a working knowledge of Assembler preferably gained in an IBM installation. Analysts must be capable of working unsupervised, will have led a project team and be experienced in a variety of business issues.

In addition to a first-class benefits package the company are able to provide outstanding career progression in a rewarding environment. Ref: SE1/2406

ANALYST PROGRAMMERS AND PROGRAMMERS

BERKS/BUCKS BORDER TO £7000

Our client, a successful manufacturing company, is at present undertaking the development of several new on-line application systems and now wishes to recruit analyst programmers and programmers with the potential to develop into the analyst programmer role in the future.

If you can offer:

- * Minimum of eighteen months' commercial COBOL programming experience.
 - * Some experience of systems analysis and design or a strong desire to progress into this work.
 - * The drive and enthusiasm to succeed in a project-oriented environment.
- The company can offer:
- * Training in advanced IBM software.
 - * Experience of a variety of applications projects.
 - * Development of COBOL programs utilising database and teleprocessing.
 - * Excellent starting salary and conditions of employment
 - * 25 days' holiday.

This is a very attractive opportunity to join a professional progressive-thinking data processing development team.

Analysts & Programmers

Why Britain's biggest process industries need to tap your talent

Turn on a tap... fill up with petrol... take an aspirin: the chances are you'll be using the end product of Kent process control technology. Kent Automation design, manufacture and market computer-controlled systems to increase accuracy and efficiency in most of our biggest process industries: water and power, oil and metals, chemicals and pharmaceuticals. As an analyst or programmer with us, you would spend a good deal of time with companies like these — on their premises, both around the UK and overseas. You'd be pitting your wits against the unique and complex problems of software design and application for these large high-technology systems, which are powered by our own ranges of PDP8 and PDP11 minis. Most important, you'd be responsible through literally all stages of the project from

system definition to commissioning and beyond.

We're a compact, dynamic company relying for our continued growth and success on the talent and expertise of our computer people. The programmers and analysts we are now looking for will be graduates with at least 2-3 years' experience, including exposure to process control: ideally, they are encouraged to develop very high levels of technical and managerial skill and many will look forward to becoming project leaders or software consultants within 2-3 years.

Salaries are a matter for discussion but will certainly be very competitive, and full benefits include relocation to Hertfordshire. If you're interested, then please contact

Wendy Village, Personnel Department
Kent Automation Systems Limited
6 Hunting Gate, Hitchin, Herts. Tel: Hitchin (0462) 54801.
A member of the George Kent Ceramics Group

Computer Staff-All Levels PROGRAMMERS·ANALYSTS·OPERATORS

Salaries up to £7,500 per annum

A major Company in the fashion industry requires computer staff at all levels to initiate and progress interesting new projects. Current systems use Database and T.P. techniques on an I.C.L. 2904, being upgraded soon to an I.C.L. 2950. Further developments are planned to expand systems into many of the production and retailing areas of the Company. There is an opportunity to develop advanced skills and realise personal ambitions with excellent salaries and conditions. Housing of all kinds is available in the area and assistance with relocation is given.

Minicomputer SOFTWARE PROGRAMMERS

ORIGINAL SYSTEMS DEVELOPMENT

LONDON NW £5,500-£8,500 + Car

This is an opportunity to join a leading company which designs, manufactures and markets the world's most successful word-processing systems. They are enjoying tremendous growth and, naturally, career prospects are very good indeed.

As a member of a creative software team, you would be closely involved in the design and development of specific customer applications, generalised packages and utilities to enhance the product range.

The opportunity will be attractive to outgoing, personable analysts/programmers who:

- have had significant grass roots assembler level programming experience on any small machine
- enjoy using their initiative, are flexible in their approach and happy to take all their tickets to get things done
- are mobile and enjoy travel both in the UK and Europe (knowledge of one or more European Languages - Spanish, French or German - would be useful).

This exciting international company will double its turnover in 1979, giving those who join now a wonderful chance to progress their careers. If you would like to hear more about it, then ring us for a confidential exchange of information or write briefly quoting ref. 967, or leave a message on answering machine after hours and we'll contact you.

EDP SYSTEMS 01.637 5796
52-53 Margaret St. London W1N 7FF

Small Systems Software

**Senior Consultant
Programmers** to £8,500

**Consultant
Programmers** to £6,900
West London

Dataskil Small Systems Department have opportunities for high grade programming staff in the London Area. We are looking for:

- 4 or more years programming experience, mostly assembler language, on of the 2 machines.
- Mini or micro experience e.g. PDP11, INTEL 8080, ICL 1500.
- Experience with a software house, manufacturer or similar.
- Valuable specialist skills such as Communications Software or Operating Systems.
- Good mobility around the London Area with a chance of overseas assignments.

For Senior Staff:

- Ability to deal with clients, produce a job definition and lead a team.

The work offers a variety of technical challenges in the high growth mini and micro market. There is software product development, bespoke systems and consultancy. Some examples are:

- Special communication interface software on INTEL 8085.
- Jumbo Jet fuel economy system.
- Ropy Disc handler for new computer hardware.
- Real Time Order Processing and Warehouse Control system.

These jobs will appeal to ambitious computer professionals who enjoy assembler programming and can take advantage of the excellent career opportunities offered by a highly successful Software House.

As well as the competitive salary you will be eligible for our 1979 Productivity Bonus Scheme. Please telephone John South, Manager, Small Systems Department, on 01-579 3131, or write to ICL Dataskil, Rodley House, 39 Ealing Road, London W5 4QU. Please quote reference CW1399.

ICL Dataskil

Mini-Micro
The Computer Professionals

A lot of the difference is centred around our International role. IBM Information Services Limited helps IBM's business run smoothly in over 20 countries, backed by one of the largest and most advanced DP installations in Europe.

We process a large part of the company's European order scheduling information and also provide online services and data banks on a world-wide basis by means of direct teleprocessing lines.

As one of our Programmers or Programmer/Analysts you'd be at the heart of this operation in contact with overseas IBM locations, helping design, develop, install and maintain international applications systems and on occasions travelling abroad to meet and help your colleagues on the spot.

We are updating and extending both our hardware and software capabilities and this continued expansion gives plenty of scope for diversifications and progression.

Right now, we're looking for determined men and women with 1-3 years programming experience, a proven interest in applications, and analytical minds.

It would be an advantage but by no means essential - we can always include it in your training.

We offer generous relocation expenses to our new headquarters in the attractive part of the South Coast, which has outstanding recreational and social facilities.

Salaries are very competitive and IBM's employee benefits package is acknowledged to be one of the best in industry today.

Interested? Then write now with full details about yourself or, if you'd prefer, telephone for an application form to John Mann, Personnel Officer, IBM Information Services Ltd., PO Box 33, North Harbour, Portsmouth PO6 3AA (Tel: 07018 21044 Ext. 3624) quoting ref: CW/939980

IBM
Information Services Limited

Production Controller

We have a vacancy in our Production Control Group for a DP professional with at least 3 years experience in an IBM environment. The successful candidate will have a sound knowledge of IBM OS/2 job scheduling, control procedures and the ability to liaise with users at all levels.

Duties will include the setting-up and running of production work on the computer, recovery of job failures, distribution of output, and providing a job status enquiry service.

There is an attractive 2 shift system which operates between 7.30 am and 9.30 pm, Monday to Friday backed up by a very good commencing salary and generous luncheon allowance, together with 4 weeks holiday, interest free season ticket loan scheme, free life assurance, etc.

Please write giving details of your education and experience to date to Miss V. Burge, Senior Employee Relations Analyst, Phillips Petroleum Company Europe-Africa, Portland House, Stag Place, London SW1E 5DA or alternatively telephone our 24 hour answering service on 01-828 2993 for an application form.

"Analysis for a Senior Programmer -
management for an Analyst"

**Wandsworth/Putney
S.W. London**

This position will appeal to an experienced COBOL programmer or an Analyst/Designer with a COBOL background who is bored with working in a large structured organisation. It offers job interest and some management responsibility.

The company, part of a major group, is an experienced DP user and has recently installed an ICL 2904. The position is deputy to the DPM, controlling the installation's 2 programmers, assisting with the design and development of a sophisticated on-line system. A major development program has been identified including the introduction of on-line facilities to existing systems.

Training in systems analysis could be provided if required. Progression could be eventually into DP or General Management, or Consultancy within the group. We would expect applicants to have over 2 years COBOL experience, and to be conscientious and determined individuals.

Situated next to the Thames, between Putney and Wandsworth bridges, there is ample car parking, East Putney, Putney Bridge tubes and Putney main line are nearby. Generous relocation expenses are available.

Positions open to male & female applicants, please telephone (24 hour service) for initial discussion or write to address below. QUOTE REF. CW141-9T

TECHNICAL MANPOWER join the new leaders and move ahead

Your move to Cheshunt and Tesco could be the turning point of your career. For you'll be establishing yourself in the forefront of programme development. And there's no more exciting or vital place to be today.

Tesco have got the hardware, the IBM 3032 and all the latest peripherals, and they are making it work in a way that management can understand and use.

You have spent some time in the industry, gaining experience on a variety of commercial projects, and you're ready to start moving up. You can with Tesco. To start with, you'll be working in a small specialist team. But the department is growing - just like Tesco itself - and opportunities for advancement will be frequent as your skills increase and you feel the need for greater responsibility.

Salary is around £8300 and you will enjoy a subsidised restaurant, Country Club membership, a contributory pension and, where applicable, re-location expenses to the pleasant environment of Cheshunt and the Lea Valley. For more information and an application form, contact: Fred Rayere, Computer Services Manager, Tesco Stores Ltd., Tesco House, Delamare Road, Cheshunt, Herts. EN8 9SL. Tel: Waltham Cross 32222 Ext. 3398.

Scientific Programmers

Help us to take the next step
in C.A.D. circuit analysis

Racal-Redac Limited, specialists in the development of interactive Graphic Computer Aided Design Systems, are currently engaged in a number of development projects, including the development of a Circuit Analysis System. This system based on the D.B.C. PDP 11 computer will simulate electronic circuits for analysis purposes and confidence in its potential has resulted in a rapid increase in its development.

This expansion has created a number of additional vacancies at all levels for Scientific Programmers (male) - female to join our small development team. The work is challenging and sophisticated and allows total involvement in the development of the whole system. We would particularly like to hear from anyone who holds a degree in Maths, Electronics or Computer Science and has experience as a Scientific

Programmer preferably using Fortran. A specific track exists for someone who will control and co-ordinate the project built within the Company and with University Research Departments and determine system and software specifications. This position would interest programming staff who are currently earning around £6,500.

Racal-Redac Limited is located at Tewkesbury, a pleasant rural town on the river Severn adjacent to the Cotswold Hills and midway between Bristol and Birmingham. Relocation assistance will be provided in appropriate cases.

Please apply in writing with details of age, experience, qualifications and current salary to: B. Ashcroft, Personnel Officer, Racal-Redac Limited, Newtown, Tewkesbury, Glos. GL20 8HE or telephone Tewkesbury 294161

Chief Programmer

Surrey negotiable c.£9,000

for a major organisation, turnover exceeding £150m, and manufacturing a wide range of essential consumer products in 12 plants throughout the UK.

Responsibility is to the Data Processing Manager for controlling all software development and applications support programming. The equipment is a centrally based IBM 370 mainframe and an extensive network of remote on-line mini computers and intelligent terminals operating in batch, teleprocessing and real time mode.

Substantial experience of applications programming, a demonstrable technical knowledge of IBM 370 operating technology, and a keen and enquiring analytical mind are the prime requisites.

Starting salary negotiable around £9,000. Usual large company benefits provided. Complete reimbursement of ALL expenses incurred in relocating. Location North West Surrey. Age not important.

TO APPLY

Please send a CV, or a letter listing professional career history to date including hardware and software exposure, current employer, position and salary, or telephone for an application form, in complete confidence, to: ANTHONY SPURR, Executive Selection Division, at the address below, quoting G729. Applications from either sex.

IBM SYSTEMS PROGRAMMER

ADVANCE INTO THE EIGHTIES

We are a newly formed group organisation whose major task is to assist other group companies with their DP requirements.

This involves a broad cross section of development covering financial, banking, manufacturing and other applications.

The Group already has a rapid expansion programme planned which will result in a large terminal network being implemented on an IBM 3032 at Head Office and IBM 4300 machines in the offices of Group companies.

With this expansion and further developments to come, we require technically competent and enthusiastic candidates with a desire to be at the forefront of IBM systems technology. Previous experience of MVS, DOS/VS, SNA or VTAM would be useful.

Company benefits are excellent and include preferential personal loans and a mortgage subsidy scheme after a qualifying period.

To find out about us phone Allan Bradshaw on 031-332-2461 or write to him at Lloyds and Scottish Computer Services Limited, Finance House, Orchard Brge, Edinburgh 4.

PROJECT LEADERS SENIOR DESIGNERS PROGRAMMERS

TRAVEL INDUSTRY

Having successfully integrated our automatic airline ticket printing system with the unique Travicom multi-access seat reservation system, we are now expanding our development team for two related mini-computer based network projects to serve the travel industry. The work is centred in our superb new office complex at:

MAIDENHEAD BERKSHIRE

We require project leaders, senior designers and programmers with low-level language proficiency on any leading mini or micro, preferably with communications, networking, PDP11 software, transaction processing or interactive peripheral control experience. For the more senior posts, proven initiative and success with similar projects, not necessarily in the travel field, is essential, together with team leadership experience.

We offer unrivalled career prospects, four weeks' annual holiday, pension, life assurance, private medical and profit sharing benefits, help with relocation, and starting salaries in the range £5500 to £8500 per annum. Above all, we offer the opportunity to join a dynamic fast-growing British Company and to participate in its success.

For further details, please telephone 0628-71511 (evenings and weekends 04914-3064).

"Are you a
Systems Analyst
bored with routine duties?"

-Move with the times!
-Move into forecasting
& planning!

£7,300 + CAR

Todays technology is advancing at a speed far greater than could ever have been imagined a few years ago. Obviously, the success of modern industry must lie with the ability to move with the times and to be aware of the developments taking place.

We are a team of data processing professionals, actively engaged in product planning and the formulation of marketing strategies, designed to ensure that maximum benefits are obtained from the introduction of new systems and hardware.

To strengthen our team, we wish to recruit a Systems Sales Planner capable of producing an annual sales plan and more importantly, a five year marketing strategy aimed at keeping us in the forefront of new developments.

We are seeking:

- 1) A Systems Analyst with a minimum of three years development experience
- 2) A sound knowledge of new technological advances currently being made.
- 3) An ability to communicate effectively with senior levels of management.
- 4) Ideally, some appreciation of marketing and planning concepts.

We offer superb working conditions, an excellent salary with impending reviews, company car, plus several exciting directions in which to develop your career.

A generous relocation package is available.

SHELL U.K. OIL

MANAGER, DISTRIBUTION MINI-COMPUTER SYSTEMS based at their Head Office in London

The Manager, Distribution Mini-Computer Systems is responsible for the overall control and co-ordination of the operation of the mini-computers throughout the Distribution Division of Shell U.K. Oil, and for the on-going development and exploitation of the facilities including staff training. The Distribution Division of Shell U.K. Oil is responsible for the operation of their Distribution Depots including the provision of the storage handling and delivery by road of all products for the Marketing Sales Divisions. Real-time mini-computers now play a vital role in that process and Shell U.K. Oil have installed 128K word CPUs and associated hardware at 14 key depots linked to the Company's Univas 1100 Series Computers at the Data Centre in Manchester. Applicants should preferably have had experience in the installation and development of real-time distributed mini-computer systems and the associated technology. In addition, experience in implementation of large computer projects would be advantageous. Applicants must have ability to explain technical material to non-computer staff at all levels including senior management. Salary around £6,500 p.a. plus £145 London Allowance subject to experience and qualifications. Shell also offer good long-term career opportunities for suitable candidates. Excellent working conditions with subsidised restaurant, first-class pension scheme and sports facilities. Other benefits include relocation assistance where applicable.

CONTROL DATA
PROFESSIONAL SERVICES DIVISION

Commercial Applications Analysts & Consultants Get to the Top..

..with the Company that is already there!

CONTROL DATA is the largest computer services organisation in the world - simple as that! However, we recognise the fact that it takes more than success to attract the best people. That is why we also pay a lot of attention to the training and career development of our employees as well as paying top salaries.

We are currently seeking ANALYSTS and CONSULTANTS with significant experience of commercial applications, preferably related to IBM equipment. To join the commercial applications group within our own PROFESSIONAL SERVICES DIVISION. This team has doubled in size during the past year and opportunities for advancement into management continue to be generated.

Successful candidates will be given opportunities to:-

- Use various Data Management Systems
- Manage projects
- Visit clients
- Work on mini-computers
- Operate as consultants
- Provide sales support

• Work on differing mainframes including IBM360/31

Job opportunities now exist in

CENTRAL LONDON

&

NORTH WEST ENGLAND

and salaries will be commensurate with experience and achievement within the range

£6,000 to £10,000 p.a.

The biggest advancement of your career could be as far away as your telephone.

MORE THAN A COMPUTER COMPANY

Computer Manager

Croydon, the largest of the London Boroughs, is at present evaluating proposals and tenders for new Computing facilities which will look towards the 1980s. A development programme for the next 10 years has been identified, envisaging the use of current sophisticated software and on-line facilities.

The Computer Manager will be responsible to the Head of Management Services for the implementation of the programme and for running a system that will meet the demands and complex needs of the Borough. There will be major opportunities for contributing to development work.

The person we are seeking should have successful experience in the development and management of systems, preferably based on general purpose medium range facilities. He or she may already be a computer manager but may alternatively have a good systems management background and be ready to move to this wider role.

CROYDON

Salary up to £9,000 per annum, with an increase pending.

Please send brief career details to the Head of Personnel Services, Taberner House, Park Lane, Croydon CR9 3JS. Candidates whose backgrounds look interesting will be invited for a preliminary talk about the post.

ilea

INNER LONDON
EDUCATION AUTHORITY

Systems Analyst/ Computer Programmer B

£4,819-£6,643 (Including London weighting)

This is a new post, available for an initial period of one year involving the overall responsibility for the implementation, maintenance and development of a computerised system for distribution of job vacancy information, designed to improve the capacity of the Careers Service in helping young people to find suitable employment.

It will initially operate in the ILEA Area but it is planned to extend it to Greater London and the Home Counties. The person appointed will work with the staff of the Schools and College Computer Service, based at the City Polytechnic Computer Centre, 139/141 Minorie, London, EC3.

The system uses a SYSTIME 8000 (RDP 11/80) computer running under BASIC PLUS. Experience of similar systems will be useful but not essential. The post will provide scope for innovation.

Further details and application forms obtainable from the Education Officer (EQ/Edch 1B), Room 307, the County Hall, London SE1 7PB (please enclose a stamped addressed envelope).

Forms to be returned not later than JUNE 1, 1979.

MARCOL COMPUTER SERVICES REQUIRE DECISIVE INDIVIDUALS

Who look forward to better opportunities in the future, working on medium and large scale IBM and ICL projects, both here in the UK and Europe.

PROJECT MANAGERS

Salaries to £10,000

Exceptional opportunities have arisen for Project Managers to develop their skills further whilst retaining a live systems involvement. Our Project Managers are people who get things done, motivate people in project teams, establish good user relationships and communicate well with all levels of DP management and staff.

We expect them to have a wide range of business and computer skills with the personal competence to understand user problems and to be able to define realistic solutions and timescales by using their analysis, design, programming and management experience. They should also have the personality to supervise teams of people with the managerial confidence to implement systems to the client's satisfaction within the full budgetary responsibility in their charge.

PROJECT/TEAM LEADERS

Salaries to £8,500

To contribute to our continuing expansion and success in the medium to large IBM and ICL 2900 project markets, we require experienced and enthusiastic people who are self-motivated and keen to increase their knowledge and experience as Project/Team Leaders. Our Project/Team Leaders are responsible for the supervision and motivational teams of professional staff designing and implementing major systems for our clients. In addition to the technical involvement, the Project/Team Leaders will work closely with their Project Manager and their team to ensure that all schedules are met and that the team have all the necessary resources to complete their tasks. The personal attributes should include a strong technical knowledge of IBM 370 and ICL 2900 systems and COBOL programming, coupled with a background in analysis and systems and program design and specification writing. He or she should have implemented at least one major system and have a strong desire to succeed in a demanding and highly rewarding environment.

SENIOR PROGRAMMERS

Salaries to £7,500

Senior Programmers are needed to provide the expertise and in-depth experience essential in the successful implementation of commercially complex and technically challenging projects. Our Senior Programmers need a professional attitude towards their work with a strong in-depth knowledge of IBM 370 DOS or OS or ICL 2900 VME hardware and software and sound ability in COBOL programming. They should also have a thorough understanding of program design and specification techniques and a record of successful program and systems implementation in a project environment.

PROGRAMMERS

Salaries to £6,000

Self-motivated programmers with a professional attitude towards their work and the desire to expand their knowledge of programming and design of systems skills are required to work in a project environment alongside really top data processing people. If you have at least 18 months COBOL experience on any computer with a high degree of fluency in the language and perhaps some analysis experience then, there is a place for you on one of our project teams. Come and see how you can expand your horizons.

Marcol's record of implementing well over £2,000,000 worth of IBM and ICL medium and large scale projects in the last year successfully speaks for itself. Our involvement with our clients covers much more than programming — like systems research and evaluation, design, customer education and training, consultancy and implementation — you think you can achieve one or more of them in a year or two, then we want to meet you to discuss your future with Marcol.

Projects are commencing shortly for both the U.K. and Europe and preference is given for overseas work to our existing staff but our current requirement and commitments will give you an opportunity of working in Europe within six months, if you want to. Retraining in eg. 2900 VME will be given.

We want you on our team . . . for full details on these jobs and many more contact
DEREK ASHLEY on 01-402 9355.

MARCOL
Group

Total capability from the
80 Queens Gardens London W2 3AF Tel. 01-402 9355 (24 hours)

MYRIAD AMSTERDAM

A major manufacturing organisation wishes to recruit ANALYSTS and PROGRAMMERS to implement both local and international systems on large IBM equipment. The modern offices, situated in one of Europe's most fascinating cities, are well serviced by an efficient public transport system that provides easy access to all parts of Amsterdam.

Full accommodation will be provided by the company and assistance with school fees will be available where necessary.

ANALYSTS

£10,000-£15,000

To assist with the development and implementation of commercial applications the systems analysts will possess a good academic background coupled with four years or more data processing experience, including formal training in systems analysis and design.

The successful applicants will have two years' programming to their credit (preferably COBOL) and have functioned as an analyst on at least one major project from feasibility to implementation. Team leader experience will be an added advantage.

Persons joining the company now will be required to stay for a minimum of two years, after which it is hoped they will continue to enjoy the high standard of living offered by our client in Amsterdam.

REF: S1/2405/CW

PROGRAMMERS

£7,000-£10,000

Programmers are required to join project teams developing a variety of commercial systems, in COBOL, on an IBM 370/158 operating under OS.

One position exists for a person with 2 years' data processing experience, half of which will have been gained in a programming capacity using COBOL.

Applicants with more experience, particularly IBM OS knowledge, will command salaries at the higher end of the range.

MYRIAD APPOINTMENTS LIMITED

30 Fleet Street London EC4Y 1AA
01-353 0981 24 HRS.

A large International organisation based in an easily accessible part of N.W. Kent are currently looking for staff at various levels for their expanding technical support department

OPERATIONS SUPPORT

to £5500

A minimum of 1 year's operating or data control experience, including knowledge of OS JCL, is required for positions in Job Control and Data Control. The installation is linked via a data 100 network to a large 370/158 running under OS/VS1.

The technical support department operates a flexi-time system and therefore this is an ideal opportunity for operators to move from shift work into an interesting and demanding DAYS ONLY position.

There is a recognised company career path which includes the possibility of moving into programming in the future. Excellent staff benefits include discount on a wide range of products, staff restaurant and an active sports and social club.

COBOL PROJECT LEADER PROGRAMMER/ANALYST INDUSTRIAL AND MANUFACTURING SYSTEMS

A dynamic and successful software house based in W.1. are looking for a Project Leader to recruit and control a team of 3 Programmers.

The task will be to program and implant a real time Production Control System on Data General CS series equipment. The Project Leader will subsequently support and assist in the marketing of the system throughout the UK and Europe.

Previous experience must include Cobol programming skills and real time systems and it could be helpful if experience of Data General equipment on manufacturing systems was part of their background.

Our current Project Leaders earn high salaries in a demanding and stimulating atmosphere and career prospects are outstanding. Salaries and bonuses are by negotiation.

INTERNATIONAL AMERICAN BANK COMPUTER AUDIT

We are a major American Bank, long established in London. Presently we are expanding our activities considerably Worldwide and particularly in Europe.

Large data processing projects are currently being developed and more are planned in London, Europe and the Far East. The equipment is mainly IBM 370 and IBM System 3/32/34.

As a result of this expansion, the International Audit Department wish to recruit a young man or woman, to join the Computer Audit team. The position will suit a self-motivated programmer, in their mid-twenties with at least 2 years' experience of COBOL Programming under DOS/VS (preferably in a banking environment), who wishes to develop their career by moving into the fast expanding field of Computer Auditing.

The post affords the opportunity of working with various Computer Systems, both in London and Overseas, and offers excellent training to keep the candidate at the forefront of Computer technology.

Generous fringe benefits include:

- ★ Low interest mortgage and personal loan facilities
- ★ Free lunches, BUPA contribution and life assurance
- ★ Interest-free season ticket loan
- ★ Profit sharing
- ★ Non-contributory pension scheme

PROGRAMMERS

TO WORK ON DATABASE AND
ON-LINE SYSTEMS

CENTRAL LONDON

Up to £6500

Looking for a positive opportunity to upgrade your programming experience?

Our clients (a major bureau installation) have a lot of new development work on hand, many projects being related to database, on-line, COM and communications systems.

To strengthen their applications programming group and deal with the numerous new projects, our clients have decided to recruit several more programmers. The Central London location is convenient for tubes and all main-line stations.

The work is interesting and often technically challenging, career prospects are good, and you would be working on the latest hardware. No travel is required and normal hours apply.

You should have at least two years' programming experience, ideally including COBOL (on any hardware), but if you have used another language, retraining will be provided. Further training in modern techniques will be given, as appropriate.

If you are working in a mundane environment and can see little chance to progress or learn new techniques in your present job, ring us in confidence, quoting ref. 156. Alternatively, leave a message on our answering machine and we'll contact you.

EDP SYSTEMS 01.637
52-53 Margaret St. London W1N 7FF 5796

Computer Operators

Your future has been worked out for you

If you're an ambitious Computer Operator looking at your future, you won't have to look very hard. It's all been done for you.

Our client, based on the South Coast, has some ambitious plans for the future already under way.

The company is part of a major consortium providing a range of services to associated companies in the shipping industry.

A Burroughs B6700 computer with an on-line Database system is designed to create an even more efficient and diverse service system.

To ensure the continuing success of existing and future projects the company has decided to add to its Computer Operating staff.

The positions are both challenging and stimulating and applicants should have substantial operating experience, preferably on Burroughs equipment.

Salaries are on a range up to £4588, inclusive of shift allowance, depending on experience. The company offers excellent fringe benefits including company pension plan, L.V.s. and full relocation package.

Please write with full career details, quoting Ref. CW/266, and listing any company to whom you do not wish you application forwarded, to Peter Phillips,

Riley Advertising Limited, Old Court House,
Old Court Place, Kensington, London W8 4PD.

CITY OF LONDON

SENIOR PROGRAMMER/ANALYST Up to £6,093

A newly created position for a person of proven ability in both disciplines.

The Corporation operates an ICL 1902S with 3 EDS, 8 Track tape, Train Printer, etc.

There are some 30 varied applications and projects which will provide a stimulating environment and add greatly to your experience.

Benefits include generous holidays, superannuation scheme, interest free loans for season tickets, subsidised staff restaurant and resettlement scheme for approved cases.

Applications, setting out full details of education and work experience to:

Colin Ellis
Computer Services Manager
Guildhall, London EC2P 2EJ

who will be pleased to discuss the appointment with you. Telephone 01-606 3030, extn. 2304.

COMPUTER PROGRAMMER

Applications are invited for a post in the College's Computing Laboratory, to join a group providing a general advisory and applications service to users of both the College's DEC system-10 and the University of Manchester Regional Computer Centre.

Applicants should be graduates in Mathematics, Computer Science or one of the Physical Sciences, and have a good knowledge of programming and preferably some experience in advisory work.

The appointment, to start on a date to be agreed but no later than 1st October 1979, will be for the period 12 months.

£2384-£2604 per annum (under review).

Applicants (two copies), giving details of age, qualifications and experience, together with the names and addresses of three referees, should be sent to the Assistant Registrar (Personnel), University College of North Wales, Bangor, Gwynedd LL57 2DD, from whom further particulars may be obtained.

Closing date for applications: June 11, 1979.

Systems Analysts Applications Programmers Systems Programmers

City of London

Salaries: £6,300-£8,000

A major American owned Insurance Group with total worldwide assets of £750 million has retained LOGISTIX to identify the following top calibre personnel:-

- * SYSTEMS ANALYSTS
- * APPLICATIONS PROGRAMMERS
- * SYSTEMS/SOFTWARE PROGRAMMERS

for its U.K. Head-Quarters based in the City of London.

THE COMPANY: Our client has its corporate Head-Quarters in Wisconsin, U.S.A. servicing subsidiaries and associate companies throughout Western Europe. Within United Kingdom the Group covers the areas of Life Assurance, Specialist Motor Insurance, Re-insurance, Investment, Property Estate and Farm Management.

THE PEOPLE: (a) SYSTEMS ANALYSTS:- The successful Systems Analysts will be required to conduct the initial feasibility studies, develop system proposals and program specifications. The role will also include liaison with the prospective users and senior personnel within the Management Services Unit. It is an advantage (although not essential) to have had current or recent experience in either a financial or insurance orientated environment. The promotion prospects are excellent in the medium term since opportunities will occur in both technical and line managerial spheres.

(b) APPLICATIONS PROGRAMMERS:- There are several vacancies for Applications Programmers to work in the Re-insurance Team developing a new on-line system. You should have had ASSEMBLER programming exposure preferably under DOS/VS and CICS although obviously experience within a larger scale OS installation with an independent supplier's T.P. monitor is acceptable. Candidates who wish to gain experience of working with Teleprocessing will be trained in the use of CICS.

(c) SENIOR PROGRAMMERS:- There are two vacancies for Senior Applications Programmers to work in the Life Assurance and Motor Teams. Candidates should offer a minimum of 4 years combined COBOL and ASSEMBLER experience together with current or very recent exposure to a T.P. monitor.

(d) SYSTEMS PROGRAMMER:- A single vacancy exists within the Technical Support facility for an experienced Systems Programmer offering an in-depth knowledge of Assembler programming. The successful candidate must have been involved in the generation/implementation of DOS/VS as well as tuning and monitoring the performance of the existing software. At present, program development is carried out via the terminals using LIBRARIAN ON-LINE and therefore past knowledge of an on-line and real time installation is a decided advantage. Candidates must be prepared to participate in the evaluation of new software from IBM and the independents and to assess its relevance to the installation's requirements.

THE PROJECTS: Currently the Systems Project Teams are responsible for initial feasibility studies, development, implementation and subsequent maintenance of various systems in the fields of Life Assurance, Motor Insurance and Re-insurance. The U.K. Head-office has recently ordered an IBM 3031 to supplant the existing IBM 370/148 operating under DOS/CICS/VS. In addition, the company has already installed IBM 3790's at its Regional Offices to provide up-to-date Distributed Processing facilities.

THE BENEFITS: The higher than average salaries reflect the prominence of these key personnel. Additionally, extensive benefits include Free Life Assurance, Free membership of a permanent Health and Medical Scheme, Insurance Discounts (e.g. motor), low rate Contributory Pension Scheme, free B.U.P.A. membership, subsidised restaurant, interest free Season Ticket Loan and flexible working hours.

THE INTERVIEWS: Initially, our Recruitment Consultants will conduct preliminary interviews at their London office after which candidates will be short-listed to meet the company's Systems Manager and Data Processing Manager. Offers of employment will be made promptly. It is hoped that all appointments will be taken up during the month of July. Please telephone either John or Lin on 01-491 4636.

West Midlands TECHNICAL SERVICES MANAGER c£9500 +CAR

As the prestige division of a major International Organisation, we have identified the need to recruit a data processing professional to manage a large programming and technical function.

Our configuration currently comprises a mixture of minis and mainframes and future plans have dictated the need for a rapidly growing distributed network. It is our intention that the programming and technical function develops in the direction of an internal software bureau and consequently we are seeking applications from experienced man-managers who have gained sound technical experience to spearhead this exciting phase of development.

Applicants should have at least a six year association with data processing where experience has been gained in managing a significant number of Programmers and technical staff.

Hardware comprises IBM 370, 3033 and DEC PDP/11 computers and software currently in use is PL/I, IMS DB/DC, MACRO 11, CORAL, RTL 2 and RSX 11 M and therefore experience of this nature would be a distinct advantage.

Relocation expenses are available to the successful applicant and membership of BUPA is free.

FOR A COMPLETELY CONFIDENTIAL DISCUSSION REGARDING THIS KEY APPOINTMENT CONTACT OUR ADVISING CONSULTANT:

ANDREW CARTER ON: 021-236 3781 (24 hour answering service).

Programmers

International Banking
City - to £7,000

Our International Systems Group has recently been charged with the responsibility of developing a number of computer based packages to be used in branches of Lloyds Bank International worldwide.

The packages are being written in RPG III to run on IBM System/32s and System/34s processing data in both batch and real time mode.

We are looking for better than average programmers, who have at least five years commercial programming experience in any language, and who will work in a challenging environment in an organisation which is prepared to reward success with high salaries and progression.

The background in which you gained your experience is important - but not critical, as we shall provide any necessary training.

In addition to attractive salaries, which are reviewed on a regular basis, we offer valuable additional benefits, including profit sharing, a season ticket scheme, and a generous contributory pension scheme.

If you would like to know more about these vacancies, or wish to apply for one of them, please telephone Alistair Hall or Mike Clark on 01-623 2322, or write to Alistair Hall, Training Officer, Management Services Division, Lloyds Bank Limited, P.O. Box 143, 78 Cannon Street, London, EC4A 3DX.

Lloyds Bank

Computer Journalist/Editor - Hong Kong

Computer Publications Ltd requires a Journalist/Editor to write and edit Asian Computer Monthly and Asian Computer Yearbook and to write for China Computer Monthly, which circulates in the People's Republic of China.

Essential qualifications are several years experience reporting on the EDP industry, sound appreciation for computer-related news and proven sub-editing, layout and production abilities.

The editor will work with an office staff and must possess excellent writing skills; a flair for promotional techniques which will increase the publications' circulation and advertising, and a willingness to travel in Southeast Asia.

The company offers an initial 12 month contract, return air fares to Hong Kong, salary HK \$ 7,000 per month - about £8,400 per annum (maximum income tax in Hong Kong is 15%), assistance with accommodation, medical scheme.

Applications giving full details should be sent to:
Peter Brindisi,
Computer Publications Ltd,
22 Wyndham Street,
7th Floor, Hong Kong.

INSAC

The International Viewdata Centre

The focal point for worldwide exploitation of Prestel and Viewdata systems.

The Centre, established by INSAC, is based at INSAC in London and at Systems Designers Limited in Surrey.

£100m backing for Prestel service

The viewdata age: Power to the people

Dutch user buys Prestel

Insac has foreigners in view

Insac see Prestel business target

INSAC INTERNATIONAL LIMITED

The International Viewdata Centre Marketing Division will play a key role in INSAC's marketing and development for Viewdata applications worldwide.

INSAC will provide a complete marketing, information, training, exhibition and product specification capability, based in Central London.

SYSTEMS DESIGNERS LIMITED

The International Viewdata Centre Systems Division is being established for INSAC by Systems Designers Limited, who will be responsible for the production of advanced Viewdata products, including support to international Prestel users.

Britain leads the world in Viewdata Systems! Can you exploit this lead internationally?

INSAC needs

Consultants to play a leading role in the marketing of Viewdata products and services in Europe (excluding the UK) to internationally known Companies up to £11,000

Terminals Product Manager, to manage the market planning specification and procurement of ranges of micro-based colour terminals for use in business and the home up to £11,000

Information Manager to manage a unit recognised as the knowledge centre for worldwide Viewdata. The unit will be run as a profit centre with revenue earned from publications, seminars and training up to £11,000

Marketing Executive to keep all INSAC staff worldwide up to date on the latest developments in Viewdata and to provide a specific support service for INSAC New York up to £7,000

Demonstration Supervisor to set up and run a demonstration unit for INSAC and third party Viewdata products and services up to £8,000

All posts require exceptional creativity and enthusiasm for pioneering new technologies. Most posts require some overseas travel which will be extensive in the case of Consultants.

INSAC is concentrating on the International Viewdata systems market. With its product development resources of 2100 professional staff in member companies and financial backing from the NEB, INSAC is rapidly building on its world wide successes with Viewdata.

Write to or telephone Christopher Singer, Operations Director INSAC International Limited, 17 Lincoln's Inn Fields, LONDON WC2 Telephone 01-831 7536

SYSTEMS DESIGNERS needs

Consultants in the UK for sales support, studies product design and development up to £11,000

Systems Designers and Programmers for implementation of the Centre's product development programme up to £9,000

All posts require a mix of experience that should include information systems on-line and real-time systems, communications networks, data management and high reliability systems. The senior posts will require the ability to communicate clearly with non-specialist and top-line management of major corporations. Most of the posts are based in Camberley and Frimley in Surrey, but opportunities also exist in the Manchester Branch.

Systems Designers Limited is an independent British systems house backed by the NEB with an unrivalled reputation in real-time mini and micro computer applications. Established in 1968, it is part of the Systems Designers International Group and employs over 200 professional staff.

Take a step back into the future

High on a hill in Wiltshire, overlooking the Avon, lies Malmesbury, one of the oldest boroughs in England, a town with a history stretching back for centuries.

But Malmesbury is also the headquarters of Pye TMC, a company at the very forefront of modern telecommunications development. Backed by the worldwide technology resources and finance of the international Philips Group, Pye TMC are the UK leaders in the exploitation of VLSI design techniques, and its application to a large variety of products and are fully committed to the large scale manufacture and marketing of microprocessor software based products utilising custom designed VLSI circuitry. One of our most recent developments is an advanced micro-processor-based private automatic branch exchange system which has been ordered in quantity by the British Post Office, and which is headed for world wide success. A highly advanced company, we're now expanding our strengths and are seeking the following new additions to our development and technology teams:

Senior Software Development Engineers

Analyst/Programmers are required to play leading roles in software development, from initial specification of facilities through to final documentation. To join us you should be qualified to degree level or equivalent, be well motivated, and skilled in the application of mini/micro computers with a significant real-time content. At least 4 years' experience is essential, which should have included assembler programming of mini/micro operating systems. A knowledge of at least one high level language is required. Vacancies also exist for less experienced engineers.

Senior Scientific Programmers

For applications programming in Fortran using a VAX/11-780 system for computer aided design, design automation of complex random LSI circuits. Areas of interest are: Logic simulation and Test Generation; Interactive Graphics; Layout Verification; and System Software. Successful applicants will work either individually or as part of a small project team on all phases of software development from conception and specification, through to final testing and production release. To join us you should have a degree in an Engineering or Science subject, together with a knowledge of both Fortran and electronics, with at least 4 years' relevant experience. Vacancies also exist for intermediate grades.

Informal Interviews

Queen's Hotel, Promenade, Cheltenham, May 29th.
The Heathrow Hotel, Conference Centre, Bath Road, Hounslow, May 30th.
The Grand Hotel, Aytoun Street, Manchester, May 31st.
We'll be holding informal interviews for men and women at the above locations between 5pm and 9pm on the dates shown, so why not come along and have a chat and a drink and find out more about a place in the future of communications. Naturally we'll tell you about our attractive financial rewards which include excellent salaries (up to £9,500 for senior positions), generous relocation expenses etc. If you can't make any of the dates or require further information please phone Peter Prinn on Malmesbury (066 62) 2861, ext. 296 or write to Pye TMC Ltd., Swindon Road, Malmesbury, Wiltshire SN16 9NA.

HAVEN BUSINESS SYSTEMS LTD.

Requires an enthusiastic

ANALYST/ PROGRAMMER

preferably with experience of the Aztec/Jaguar ranges of equipment.

The person appointed will be required to work with a minimum of supervision and report to the directors. A certain amount of travel and customer relation will be included and a company car will be provided. An attractive salary and commission structure will be offered commensurate with experience, we will also accept applications from trainees as expansion will create other vacancies in two to three months time.

Please apply in writing giving full details of qualifications and experience to:

CITY OF LONDON POLYTECHNIC
Programming in the City
Up to £6,643 p.a.
We have a large DEC system 10 running interactive and located in the City of London, close to Aldgate Tube Station. A Programmer to maintain this is used to our advantage.
Starting salary up to £6,643 p.a. (under review). It includes insurance, pension, good sports and facilities. Also eight weeks' annual holiday. Every opportunity to continue studying, e.g. study leave, sabbatical, course fees paid, etc., and we can guarantee a happy atmosphere to go with the work.
To apply you must be an experienced systems programmer with a degree in a relevant subject and a professional qualification.
For further details and an application form, telephone Mr. King, our Staff Records Officer, on 01-263 1030, Ext. 233, write to him at: City of London Polytechnic, 117 Houndsditch, London EC3A 7BD. Please quote ref. 197/21.

Outstanding DP opportunity (Based London/Ipswich)

We are looking for a person to assume the role of a **SYSTEMS/PAY ROLL CONSULTANT** within the employee benefit arm of one of the world's leading international insurance brokers.

You would be joining a team of Pension and Personnel specialists who advise companies on administration, personnel analysis and record maintenance. Your expertise would strengthen our DP advice and open up the payroll consultancy area.

In addition you would be responsible for maintaining and upgrading our hardware, coordinating the development of our software and carrying out a feasibility study into extending our bureau service into areas such as payroll.

Your background will definitely include work in a payroll environment giving you the necessary theoretical and practical experience, and probably include some time with a software house or the development/installation/maintenance of payroll systems.

For our part we offer you a generous salary and fringe benefits, together with outstanding career prospects. If you think you are the right person to take on this challenge such as this, write to Mr. F. J. G. Smith, Department, Willis Faber Advisory Services Limited, 10 Trinity Square, London EC3P 3AX or telephone 01-488 8282 between 10am and 4pm.

Systems Analysts Software Designers COBOL Programmers Consultant Analysts Systems Designers Project Managers

A chance to spread your wings

Herts, Cheshire & London. £5000-£9000

1978 was another extremely successful year for ICL, turnover was up by 2.2% to over £300m, with over half the business coming from overseas.

This kind of success offers a tremendous challenge to the team who provide our internal company systems world-wide - and our development plan, with a £multi-million budget, means that we now have opportunities that will appeal to ambitious computer professionals who expect rapid career progression as well as job satisfaction.

2900 Training A feature of our development plan is the introduction of a world-wide systems network based on an impressive range of hardware from ICL minis, such as System Ten and the 1500 series, through to very large 2900s. We operate a training plan which will enable you to transfer from 1900 to 2900 easily.

Project Variety & Travel Since ICL operates in 80 countries worldwide, international travel is a possibility as is the chance for longer term overseas assignments. There is also tremendous project variety, with the chance to specialise in systems software, pure systems development or maintenance and user support.

Career Development But perhaps the greatest attraction is the opportunity for career development. Working for a computer manufacturer means that you could make career moves into functions such as marketing, finance, or technical support, or perhaps consultancy with our subsidiary Datskil, Europe's leading software house.

We have vacancies in Stevenage, Leichworth, Manchester, Kidsgrove and Pulney. We would like to hear from you if you have experience in some of the following areas:

Commercial Applications

- JCL 1900 or 2900 COBOL
- GEORGE III VME-B
- IDMS
- Real-time systems
- Production and Manufacturing systems
- Marketing and Finance systems
- Engineering and Spares systems

Systems Software

- Diagnostic
- Construction of VME-B systems
- Large systems design and programming standards
- VME-B Superstructure products and systems programming
- Networking software
- TP systems software and applications
- Filestore control and data-administration

Your action! We will be holding interviews over the next two weeks, so post the FREEPOST coupon, or if you require further information telephone George Battersby on 01-788 7272 ext. 4179.

To: George Battersby, ICL, Recruitment Services, FREEPOST, 93/99, Upper Richmond Road, London SW15 2BR.

I am interested in finding out more about working for ICL.

Expected salary range, please tick:

- ☐ £5000-£6500
- ☐ £6500-£8000
- ☐ £8000+

Preferred area of work/location, please tick:

- ☐ Systems Software

ICL International Computers

Int'l Computers - Int'l CL

NORTHERN APPOINTMENTS

THE job market in the North of England continues to be buoyant, and is likely to become even more so as the North-west in particular is set to benefit well from the microelectronics industry.

Microelectronics will provide a net increase of at least one million jobs in Britain, France, West Germany and the US by the late 1980s. The major share of this, something like 60%, will go to the US, as they have responded quickly to this challenge. Britain's share of the rest will depend on how quickly we can respond to the challenge.

This conservative forecast comes from a two-year £1 million study by the well-known management consultants Arthur D. Little. The UK government was one of the 60 clients who sponsored this study. They only looked at the impact of microprocessors and microelectronics in four main sections which are expected to undergo the greatest change. These are: Cars, consumer goods, business communications and the manufacturing and process industries. All of these industries are well represented in the North of England.

This technology presents an optimistic picture for the future.

As far as technical staff are concerned, there are currently obvious opportunities in an industry where there is still a shortage of some 27,000 staff.

What Manchester does today...

By Val Halliwell

Just what motivates the DP team is far from clear. Certainly current salary levels, although improved of late, are seldom the main criterion. Neither are such motivational factors as responsibility, working conditions or job security, which is the main reason we are now seeing previously unheard of long service bonuses being awarded after 18 months' service, cars with the job (even at chief programmer level), mortgage facilities, foreign travel etc (the North West having several international airports). Key points are more likely to include career opportunities, status, job satisfaction and performance.

Generally, though, I feel that the North can and does

offer excellent opportunities for personal progression in a variety of areas. Traditionally the North grew up around the manufacturing and engineering industries, having been quick to computerise. It can therefore offer skilled computer staff the whole spectrum of applications ranging from the pure scientific to the sophisticated production and inventory control, in addition to the service areas of banks, insurance etc.

Also, we are now well into the phase of minicomputers, Digital Equipment's PDPs, IBM System 32, 34 etc, reversing the trend somewhat, as usually an existing employee can quickly be trained in RPG II or Basic + and subsequently becomes DPM.

Such installations, which often require support from software houses, have precipitated the tremendous growth of software houses and bureaux, particularly in the North, where in the last 12 months alone we have seen several newcomers to this scene.

Again, this provides an exciting prospect for the young computer professional wishing to gain experience of a variety of machines and projects, in addition to the travelling aspect, which brings us to the subject of the freelance.

There has been a change in attitude in the North to the freelance over the past year or so, in that his value is now recognised. Several Northern employers are now able to offer both short and long term contracts.

Difficult employment legislation coupled with the lack of experienced can-

didates in the area of permanent staff have contributed to this demand; the contract staff themselves being engaged on anything from clearing up backlogs of work, caused by staff shortages, conversions to new machines, to development of new software for manufacturers, all of which requires a high level of competence, responsibility and reliability on the part of the freelance.

Looking around the region generally the indications are of development and progression, as we consider the new towns of Warrington and Skelmersdale alone, in the Liverpool/Merseyside area, where we have a number of major companies moving in from the South, offering experience on European networks, together with companies committed to con-

tinued expansion, introducing new techniques and facilities expected for the 1980s, thereby presenting heavy demand and exciting challenges to computer development staff.

A little further afield, in Yorkshire, the picture is much the same, where we find heavy requirements in the sectors of user bureaux and software houses for all levels of experienced staff in Hull, York, Leeds, Halifax, Sheffield and throughout the county.

In Lancashire and Cheshire the trend continues, with demands for experience in online real time systems being predominant.

All this activity is promoting the return to the North of England of young hopefuls who, having become disillusioned with the high cost of living and transportation in the South, are quickly able to re-establish themselves in an area where the quality of life is second to none, offering first class support to the sporting world, the arts and in general facilities for a great life. Whether seeking a bachelor pad or a family home, all his needs are catered for in the North of England at a price that he can afford.

What was the old adage? What Manchester does today, London does tomorrow.

"What Manchester does today, London does tomorrow" runs the old adage. And it is a saying that Val Halliwell, managing director of Victoria Appointments, quotes in this survey of the job market in the North of England. Already buoyant, the market is likely to become even more so as the North-west in particular is set to benefit from the microelectronics industry.

NORTHERN APPOINTMENTS

MANAGING THE NORTH

LEEDS/MANCHESTER

Sales Executives

to £15,000 + exp

Our clients are well established in the mainframe computer market and in order to achieve their planned increase in market share they wish to recruit additional Sales Executives.

Candidates should have a proven track record in data processing sales and whilst not essential a knowledge of the northern region would be an advantage.

Attractive remuneration packages consisting of a high basic salary plus commission will be negotiated. A company car will be provided.

Reference: CW/79030.

TYNE AND WEAR

Computer Operations Manager

c £8500

Our client a large industrial organisation based in Tyne and Wear wishes to recruit an experienced Computer Operations Manager.

The installation which will service on a bureau basis the needs of a number of group companies, is currently a 370/148 but due to rapid expansion a 3032 will be delivered in early Autumn.

This is an outstanding opportunity for a mature operations professional and an attractive remuneration package will be negotiated including relocation expenses in appropriate cases.

VICTORIA APPOINTMENTS LIMITED

FOR THE BEST JOBS IN THE NORTH DON'T DELAY - PHONE VA TODAY!

GREATER MANCHESTER

Group Leader (Systems & Programming) Salary c. £7,000
2 Programmers Salary c. £8,000

The Group Leader, Systems & Programming, will be responsible for developing, implementing and maintaining financial, commercial, batch and ON-LINE control systems based on IBM 370/138 DDS/VS installation. Duties will also include monitoring, maintaining and supervising a team of 3 Systems Analysts and 4 Programmers. The successful candidate will therefore have the necessary 4-5 years' D.P. experience.

The Programmers will have at least 2 years' experience in COBOL programming and will be responsible for writing and testing complex computer programmes.

Our Client offers good terms and conditions of employment, being a market leader in the leisure industry.

Ref: CW01579

LEEDS

2 Systems Analysts Salary up to £8,000
4 Programmers Salary up to £8,500

Our Client, a well-known company in the Retail/Distribution Industry, now wishes to augment their development teams engaged on Industrial/Commercial telecommunications projects on a nationwide network based on a dual Honeywell 66/20 using IDS Databases.

They now require 4 Programmers with approximately 2 years' COBOL experience in a batch of real-time environment and 2 Systems Analysts with 2/3 years' experience of commercial systems design.

The Company can offer you excellent career opportunities in a stimulating business environment together with a first-rate remuneration package.

Ref: CW04579

HULL

Systems Analyst Salary up to c. £8,200+
Analyst/Programmer Salary up to c. £8,500+

Our client, a multi-national company, have embarked on an exciting phase of on-line development with their Unisys 60/60 computer, offering a challenging environment for professional staff.

Systems Analyst - An ideal opportunity for a Systems Analyst with at least 2 years' experience in systems coming from a programming background.

Analyst/Programmer - This can be a real career step for a skilled COBOL programmer who has gained some systems experience.

The Company offers good career prospects within a progressive department and of course all the normal benefits commensurate with a large company including training as required, assistance with relocation if needed and excellent sports and social amenities.

Ref: CW02579

NOTTINGHAM

Senior Programmers Salary up to c. £8,000+
Programmers Salary up to c. £5,000+

Our client, an established systems house supporting a wide variety of exciting DEC mini computer projects, wishes to make the above appointments due to further planned expansion. The successful candidates will have genuine capabilities of general commercial accounting/manufacturing applications, etc., preferably in an ON-LINE/MINI COMPUTER environment, together with sound experience of BASIC and/or COBOL, again preferably on mini.

Outstanding applicants with a.p. experience on mainframes may be considered.

The Company offers excellent opportunities for personal progression together with the security of terms and conditions of employment akin to only large concern.

Ref: CW05579

NORTH-WEST

Senior Operators Salary £5,350 + Bonus

Due to continued development our client now requires a number of Operators with upwards of 3 years' experience gained in a large mainframe environment, e.g. 1 megabyte + to take up these Senior positions.

Our Client offers excellent working conditions and terms of employment including substantial fringe benefits package and a clearly defined career path.

Full relocation expenses are available.

Ref: CW03579

NORTH-WEST

We are always looking for Professional Freelance Programmers, Analyst/Programmers and Systems Analysts with at least 4 years' sound experience.

We can offer you:-

- Competitive Rates
- Continuity of high quality assignments
- Professional Guidance in all financial matters

PROGRAMMERS**

Fine Arts Developments Ltd. an international company based in Preston has, over the last 10 years, been one of the UK's leading growth companies whose main activities are mail order, manufacture and distribution in the UK and overseas. The company is introducing new hardware including an IBM 3031 with laser printer and distributive processing units (8100s and 3760).

The introduction of new hardware allows new thinking, to take advantage of increased computer facilities.

Project teams will be set up to examine existing systems and coupled with a planned training programme, will provide a first-class platform for people to enhance their personal and technical skills. Suitably qualified applicants should be ambitious with a desire to broaden their knowledge on a new and technically advanced machine.

Attractive starting salaries will be backed by a first class package of benefits, including relocation expenses, awaiting those fortunate to work in this progressive environment.

Telephone us NOW to arrange an immediate interview 061-491 1666.

A major Group of Manufacturing Companies with a Group Turnover over £180 million are preparing for the development of several major systems in the Manufacturing Administrative and Management Information areas. They now require additional staff to support an extensive development schedule.

The client is looking for sound commercial experience possibly in a Manufacturing Environment and involvement in at least one major project from feasibility to implementation. Individuals with knowledge of Teleprocessing and Communications would be of particular interest, but the emphasis will be on proven expertise in Business Systems Analysts.

A large Multi-National Group have a requirement for Senior Analysts and Analysts to assist in their development programme.

A configuration enhancement is planned for the near future and the successful applicants will be involved in the associated developments.

A sound commercial background together with an ability to take on new work is required. Experience of Financial Applications and or production control is desired.

Applicants should be able to demonstrate ability to handle projects from design to implementation.

These positions offer the opportunity for career development along with the latest techniques.

Systems Analyst

around £6,000

This appointment is with Holset Engineering Company Limited, a successful and expanding £30m. turnover company engaged in the design and manufacture of advanced original equipment for the worldwide automotive, marine and industrial markets. Strong financial and manufacturing systems play an important part in the control and development of the company. The installation has an IBM 370/138 utilising QDS/VS in a DB/OC environment using CICS and DL/I - later moving to IBM 8100. The Systems Analyst, reporting to the OP Manager, will be involved in a loose project team environment with special emphasis on financial systems. The scope of involvement is broad, the atmosphere friendly, and the experience should be invaluable. Training will be given as an integral part of the job. The post calls for some experience in financial systems, ideally gained in industry or commerce working in a similar installation. Starting salary is around £5,000, attractive benefits include 33 days' holiday, excellent pension scheme and generous relocation help, where appropriate. Please telephone for an application form or write in sufficient detail to make this unnecessary, to: R Rutalski, Manager, Personnel Development, Holset Engineering Ltd., Turnbridge, Huddersfield HD1 6RD. Tel: Huddersfield 22244

HOLSET

TYNE AND WEAR TRANSPORT VACANCY SYSTEMS ANALYST/ PROGRAMMER

Salary range £5,736-£6,452

Applications are invited for this newly created post within the Finance Department of this Executive from suitably qualified and experienced persons.

The successful candidate will be responsible to the Administrative Services Officer for advising the Executive in data processing matters and for assisting other Managers in the preparation of feasibility studies of systems under consideration for computerisation.

The duties of the post will include the determination of information requirements; evaluation of existing systems and their suitability for computerisation; the regular review of existing operational systems; supervision of the operation of TSSC Remote Job Entry device; assistance in the selection and training of D.P. staff; liaison with Tyne and Wear County Council O.P. Staff in all matters of mutual interest; and participation in an in-house Steering Group.

The appointee will also play an important role in the development of integrated computerised systems for Metro operations. Conditions of service are those laid down by the Joint Negotiating Committee for Non-Manual Employees of Passenger Transport Executives and appointment is subject to meeting the medical requirements of the Executive's Medical Officer.

Applications stating age, qualifications and the names and addresses of two referees to be addressed to:

Associate Director (Personnel)
Tyne and Wear Transport
Manoir
Newcastle upon Tyne NE1 2EL
to arrive no later than Friday, 1st June, 1979

CITY OF SHEFFIELD POLYTECHNIC

Department of Computer Services

SENIOR SYSTEMS PROGRAMMER

Post No 268
AP5 - £4773-£5073 (including supplement)

Will be responsible for the installation, maintenance and development of systems software on the IBM 370/135 computer and responsible to the Systems Project Leader. Applicants should have previous experience of IBM Assembler language programming, the IBM OS/VS1 operating system and of IBM equipment.

Requests for an application form in writing only please to the Recruitment Section of the Personnel Department, Sheffield City Polytechnic, Halford House, Fitzalan Square, Sheffield S1 2BB. Completed forms should be returned by 8th June.

THE UNIVERSITY OF LEEDS SYSTEMS ANALYST

Salary up to £7145

A systems analyst is required to join a small team of analysts and programmers in the Information Systems Unit, which is actively planning for on-line systems to be implemented after delivery of an ICL 2904 computer, and which is currently maintaining an on-line range of batch systems on an ICL 1901T.

A sound knowledge of COBOL and a good background in ICL hardware and software is necessary (essential) with some on-line experience.

Further details can be obtained from Mr. M. Lamell, Senior Assistant Registrar (Personnel Services), The University of Leeds, Leeds LS2 9JT.

Written applications should be sent to the Registrar, The University of Leeds, Leeds LS2 9JT, quoting reference number 119/79, by no later than 1 June, 1979.

ANALYSTS

To £6.5k LEEDS

The Burton Group is best known for its mens and ladieswear retail chains. The Credit Systems Team - which is part of the Management Services Division - provides the full systems requirement for the Group's Credit Company - Readycredit Ltd. Readycredit is already a market leader in the last expanding credit card business but is well placed - and ambitious - to develop and diversify its activities.

In fact, expansion is rapidly becoming the keyword of the Burton Group for, as well as having a wide range of challenging projects to work on, the successful applicants will be supported by new hardware which is currently being installed - twin 2980s which will operate under DME with MOPS and VDUs.

We are looking for:-

1 SENIOR ANALYST - who should have several years of relevant commercial experience.

1 ANALYST - who could be fairly new to Systems but with a sound programming background.

In addition to an attractive salary structure, we offer a competitive total remuneration package. Annual review date is September 1st and the bonus a substantial one - for a job well done. The package also involves paid overtime, retail discounts and if appropriate, full relocation expenses.

Telephone Tim Mackereth on Leeds (0532) 36373, Ext 538, or write to him at the Burton Group Limited, Hudson Road, Leeds, LS9 7DN, West Yorkshire.

BURTON

NORTHERN REGIONAL HEALTH AUTHORITY

SENIOR SYSTEMS DESIGNER (SCALE 14)

Applications are invited for the post of Senior Systems Designer in the Regional Statistical and Operational Research Section. This is a senior post in a team of three which is concerned both with providing computing support for the work of the section and undertaking specific project works.

An ICL 2980 operating under DME will shortly become operational.

Applicants should preferably be of graduate or equivalent status in a numerate science with demonstrable statistical and/or computing experience.

Salary scale £5537-£6715 p.a. (increase pending). New entrants to the NHS will normally commence on the minimum point.

Potential applicants who wish to discuss the post can do so if desired with Mr. R. A. McNey, The Regional Statistician, on (0832)-854188, Ext. 3195.

Application form and job description available from the Regional Personnel Officer, Northern Regional Health Authority, Benfield Road, Welkergate, Newcastle-upon-Tyne NE6 4PY.

-Closing date 11th June, 1979.

COUNTY TREASURER'S DEPARTMENT SENIOR COMPUTER PROGRAMMER

(Grade 113) - CARMARTHEN

Grade: AP5 £4773-£5073 inclusive of supplement

Applicants for this post should have appropriate training and experience.

A proven record of achievement as a COBOL programmer is essential. A working knowledge of another language and of the

The Council has an ICL 1904 computer with computer systems links to its District Councils and to various schools.

Application forms, returnable by 31st May, 1979, are available on receipt of a stamped addressed envelope (from the Director of Personnel and Management Services, County Hall, Carmarthen).

NORTHERN APPOINTMENTS

BASIC RSTS OPPORTUNITY

SYSTIME is the most successful British company in the field of mini computer based business systems. Our remarkable success in the last six years has been achieved using two important elements. One, a top range of products supported by first class back-up facilities and Two, by employing the most experienced and ambitious people in the business.

The inherent enthusiasm and team spirit within the company has enabled us to develop a highly efficient and profitable organisation in which individual talent and drive can earn just rewards.

Opportunities exist in: LEEDS for SOFTWARE CONSULTANTS ANALYSTS/PROGRAMMERS PROGRAMMERS

To join a small team of enthusiasts, responsible for the design and implementation of new Software packages for commercial systems.

Experience of Production Control is essential and/or senior positions proven ability to plan and control projects from inception to acceptance is required. Knowledge of PDP 11 Hardware, RSTS and BASIC + would be an advantage. Some travel is necessary and company car or allowances will be provided as appropriate.

Programmers require at least one year experience of commercial applications, preferably with knowledge of BASIC +, RSTS or RSX 11.

If you wish to develop and extend your ability to the full, Systime is the company to work for. Real opportunities exist for you to increase your responsibility and income.

We offer attractive salaries, company bonus scheme, comprehensive benefits package including relocation if required.

Interested? Then contact Chris McDonnell on Leeds 707411 or write with brief career details to:
Systime Limited.,
Concourse Computer Centre
432 Dewsbury Road
Leeds LS1 1DF.

SYSTIME

THE UNIVERSITY OF LEEDS

DEPARTMENT OF LINGUISTICS AND PHONETICS

Applications are invited from suitably qualified candidates for the post of COMPUTING ASSISTANT in the above Department. The main part of the work will involve developing machine language programs for a PDP mini-computer interfaced to various laboratory instruments used in speech analysis and synthesis, though computing work in other areas of linguistic research may also be required. The appointee will be made with effect from 1 October 1979 for a fixed period of one year. Salary at an appropriate point on the 18 scale for Other Related Staff (27/5-28355) under review, according to age, qualifications and experience.

Application forms and further particulars may be obtained from the Registrar, The University, Leeds LS2 9JT, quoting reference number 147/3/AZ. Closing date for applications 16 June 1979.

UNIVERSITY OF BRADFORD

Computing Laboratory - Computer Officer Post
Applications are invited from graduates and suitably qualified persons for two posts in the University's Computing Laboratory which operates an ICL 1904 minicomputer under ICL 1904/1905 operating systems and provides a central service for research and teaching within the University.

Opportunities for Systems Analysis & Programmers

West Yorkshire

RHP, Britain's largest manufacturer of Ball and Roller Bearings, have an established Computer Bureau at Ferrybridge servicing manufacturing locations in the North of England.

Data Processing systems play a vital part in the control of the day to day operation of the Company in the areas of sales, manufacturing and accounting. Systems are run on an ICL 2904 Computer in COBOL with a growing communications network. It is our intention to extend communications to the other factory units.

We are looking for young, enthusiastic men or women to fill the following positions:

Systems analyst

With background in both computer and O & M systems to become involved in general information flow. A knowledge of database concepts would prove useful.

Programmer

To work as a member of a project team programming in COBOL. Experience of ICL Software and equipment would be desirable.

Attractive salaries, good career prospects and the usual fringe benefits associated with a large international company are offered. Assistance will be given with relocation expenses.

Please write for application form or telephone:

IMS OPPORTUNITIES Programmers & Analysts £4000-£6000 depending on experience

Our client is a well known manufacturer in beautiful South Cheshire, convenient for motorway access.

Their well-established 370 IMS/VS installation is already extremely sophisticated, with heavy use of database and on-line techniques, including program development. System implementation is continuing apace, leading to the vacancies described.

There can be few better environments for talented and ambitious DP professionals, so the sooner you apply, the better.

RURAL CHESHIRE

PROGRAMMERS

★ Minimum of 18 months solid programming experience on any machine.

★ Ideally PL/1, but Cobol very acceptable.

ANALYSTS

★ Must have taken a significant system from start to finish.

★ Production applications preferred.

Salaries are attractive, and a productivity bonus is also paid. Assistance with relocation will be offered, where necessary.

TRAINING

Suitably experienced persons would be trained in any additional discipline needed for the task.

TO FIND OUT MORE, TELEPHONE (TRANSFER CHARGES IF NECESSARY) OR WRITE (NO STAMP REQUIRED) TO ARNOLD SAMPSON.

Initial interviews will be held in Manchester or London.

CAPP ASSOCIATES group provides permanent and contract recruitment services to clients and applicants

YOU TOO COULD ESCAPE TO YORK

SENIOR PROGRAMMER

Are you a Senior Programmer? Could you take charge of a conversion? Our client, a large multi national combine in a wide variety of consumer goods, has recently up-graded from Honeywell 20/40 to Level 66.

It is felt that you will have about 3 years experience, ideally in Honeywell COBOL, but other hardware would be considered. For this position our client will pay generously, plus all out of pocket expenses whilst away from your home base.

Initially you will be employed at York for about 9 months, at the site of one of the group companies. Your first assignment will be to convert all existing systems, once this is completed you will take up permanent employment at their Manchester location.

This is an unusual and exciting opportunity, applications are invited from applicants who wish to form a career path within a large company. Benefits include, discount on all group products, free dental care, medical centre, canteen and social club.

Positions open to male & female applicants, please telephone (24 hour service) for initial discussion or write to address below. QUOTE REF. CW 140-9MB

Programmers/Analysts

We are the British Mail Order Corporation, Europe's largest and most successful Mail Order company and due to a rapid expansion in business we now have vacancies in our computer section for the following positions.

Programmer

For this position we require a young, energetic person educated to 'A' level standard with at least 18 months COBOL programming experience and preferably some knowledge of Assembler/PL1, (although this isn't essential as training will be given).

The work is interesting and varied and the successful applicant will become a member of a lively, young Project Team involved in all aspects of programming work including updating existing financial and accounting procedures and developing new programmes and systems.

Senior Programmer/Analyst

The successful candidate will be required to report to, and at times deputize for the Project Leader in a wide variety of work including investigation and development of new and existing systems as well as writing, testing and implementing programs relating to our Agency and Marketing Operations. Ideally we want a responsible, self-motivated man or woman educated to 'A' level standard with at least 2 years Assembler Programming experience.

A knowledge of COBOL would also be an advantage and you should be able to communicate clearly, both orally and in writing with an ability to apply computer terminology to practical situations.

For each of the above positions we can offer excellent promotion prospects plus a competitive salary, commensurate with experience, good working conditions and attractive fringe benefits including staff discount on Catalogue Merchandise.

Please write with full details of salary and career to date to:-

Development Managers

£7500 + + CAR AND BENEFITS

Ward & Goldstone Limited, an electrical manufacturing group based in North-West, with a current annual turnover of £60 million, and 6,000 employees, have embarked on a policy of further divisionalisation.

In line with this, some excellent opportunities are being created for experienced D/P personnel.

In future each division will be responsible for its own computer systems development, including programming, and managers are now being sought to lead these divisional teams.

Applicants should have:-

- ★ At least 7 years' data processing experience, mainly in systems/business analysis.
- ★ A good all-round systems background, though some manufacturing experience would be advantageous.
- ★ The proven ability to manage projects from feasibility study through to implementation.
- ★ Supervisory experience of analysts/programmers.
- ★ A knowledge of IBM 370 hardware and software.

We are seeking to fill four such positions all in the Lancashire area, and conveniently located for the motorway network, at:-

Work

Analyst/Programmers & Software Programmers

**Discover the
challenge of major
on-line applications
projects with Ford
at Basildon**

Computers in manufacturing have really come of age in Ford - and at a time when they're still in their infancy in many other companies. Ford offers a unique combination - the exposure to manufacturing applications you'd only get at the sharp end in industry and the variety of hardware and software you'd expect only in a bureau. Our computer function is constantly expanding and to help us maintain and develop no fewer than five major projects starting in the next year, we now need more experienced Programmers and Analysts.

The projects involve on-line applications using CICS and/or DL/I. You will be using such equipment as an IBM 370/138 with 512K running under DOS/VS and Power/VS and an additional machine due to be installed this year. All the programme updating is done on on-line VDU's using SPMOL and there are communication links to Antwerp in Belgium, Troy, USA and Cologne in Germany used for data transfer and transplanting of systems.

As an Analyst/Programmer you should have at least two years COBOL Programming or Analysis experience preferably gained in a manufacturing environment using CICS. The Software Programmers should ideally have experience on an IBM Mainframe in a DOS/VS environment and be experienced on CICS and DL/I.

Any supplementary training necessary will be provided by us. We offer a salary of up to £8,700 p.a. including Supplement a full range of fringe benefits which include Ford's Special Car Purchase Plan and relocation assistance where appropriate.

Please write to Keith Nicholson, Room 33/420, Tractor Plant Ford Motor Company Limited, Cranes Farm Road, BASILDON, Essex.

CAMPARI INTERNATIONAL LIMITED

ASST. DATA PROCESSING MANAGER . . . TO £7000

An opportunity has arisen for a person to gain valuable experience in the management of a DP dept. We are one of the leading suppliers of leisure clothing and equipment in the UK and we have subsidiaries in Holland, West Germany and Sweden.

The main responsibilities will be to run the UK dept. and assist the DPM with future development in the UK and abroad. Current equipment includes IBM System 3, 34 and 32 with a 3B to be delivered in March 1980. Candidates will have a thorough knowledge of programming and systems work on the above equipment and an in-depth knowledge of RPG is essential. On-line experience will be a distinct advantage.

In addition to a competitive salary, benefits include profit sharing bonus, staff discounts, and medical and personal accident insurance.

For further details please contact Miss D. B. Moore, Personnel Officer on 450 8681, or write to: Campari International Limited, Campari House, Prialeway Way, Staples Corner, London NW22 7AZ.

holt-saunders Eastbourne

MANAGEMENT &
EXECUTIVE SELECTION

UNIVERSITY OF LONDON COMPUTER CENTRE

The University of London Computer Centre provides a regional computer service to the University of London and to Universities in the South-East and South-West of England. The Centre is equipped with Control Data 7600, 8600, 8400 and CYBER 72 computers and supports a large communications network of over 50 remote batch terminals and 30 keyboard terminals.

An exciting programme of development is planned which will include substantial replacement of the existing equipment in the early 1980s.

Applications are invited for the following posts:

OPERATING SYSTEMS GROUP

Senior Analyst/Programmer New Systems Evaluation

Two Senior Analyst/Programmers are required to assist in the evaluation of computer systems which are under consideration as part of the Centre's development plan. The successful applicants will join a small section which is currently involved in design and evaluation and will become the software installation team for the new systems.

The work will include a significant development content in a multiple system environment.

Candidates for these posts should have several years of experience in operating systems development or support. Experience with computer selection or with multiple computer systems would be an advantage.

Analyst/Programmer Systems Integration

Two Analyst/Programmers are required to work on integration, testing and reliability monitoring of the Centre's operating systems. This is a specialist field within the Operating Systems Group and offers an excellent opportunity for young graduates with an interest in operating systems to gain experience. Candidates should have a good knowledge of high level and some knowledge of machine level programming. Experience with Control Data equipment is not essential.

USER SUPPORT GROUP

Analyst/Programmer Compilers and Graphics

An Analyst/Programmer is required to work in the User Support Group with particular interest in the implementation, maintenance and support of compilers and graphics software. Candidates for the post preferred should possess a qualification in Computer Science, or have equivalent experience, with high level of fluency in FORTRAN. Experience of Control Data Equipment is not essential.

Analyst/Programmer Advisory and Documentation

Applications are invited for an Analyst/Programmer in the User Support Group to make up the team of full-time Advisers at the Centre.

Applicants must have knowledge of FORTRAN and be able to communicate with users. Experience of the ULCC system would be an advantage.

Salaries will be commensurate with age and experience on scales £3886-£8452 plus £502 per annum London Allowance.

The Centre offers excellent conditions of service and operates the Universities Superannuation Scheme.

Further details and application forms are available from: Miss H. M. Gubby, ULCC, 20 Quillford Street, London WC1N 1DZ. Telephone: 01-405 8400.

Applications close two weeks after the appearance of this advertisement.

THE OPEN UNIVERSITY

1969 **10** 1979
TENTH ANNIVERSARY

RESEARCH PROGRAMMER CYCLOPS

The Open University is collaborating in the development of an advanced microprocessor terminal system for use in business and training applications. There is a vacancy in the project team for a Programmer to work on both microprocessor and mainframe software connected with the project. The post is for 2 years.

Applicants should have experience in one or more of the following areas: DEC/PDP systems, PASCAL, microprocessors, or graphics.

The programme will work at the University's headquarters in Milton Keynes. The University offers attractive working conditions including six weeks annual holiday and assistance with relocation to the area.

Salary will be on an appropriate point on the scale £4,232-£7,145 p.a.

Applicants may telephone Milton Keynes 63424 for information about the post.

Application forms and further particulars are available from The Recruitment Office (MB3771/1), The Open University, P.O. Box 78, Walton Hall, Milton Keynes, MK7 6AL or telephone Milton Keynes 63408; there is a 24 hour answering service on 63668.

Closing date for applications: 7th June.

We're at the forefront of computer technology, we're successful and we're growing fast. This continuing expansion means that part of our Product Development Group based in Reading needs to take on more experienced computer operations staff. It also means that for the right people the career progression we can offer in Reading and throughout the ICL Group, will be second to none. Check the details below to see where you could fit in.

Team Leaders — up to £5804
Senior Operators — up to £4600
Operators — up to £4200
(salaries inclusive of shift allowance).

Using ICL 1904S, 2903, 2904 and System 100 for you will:

- Provide a communications based George 3 service for development support and maintenance of 1900 order code software.
- Service commercial workloads for the Software and Literature Distribution Centre.
- Create tailored software libraries and executives for all ranges of ICL machines.

We need to take on people with experience of the following:

- GEORGE 3
- EGRM exec. — nps. exec. on a 1900
- E3RM exec. — nps. exec. on 2903

MYRIAD

COULD YOU BE A RECRUITMENT CONSULTANT?

LONDON

£7500-£12000

If you are interested in recruitment but do not have the necessary experience Myriad may be able to give you the opportunity to train as a Recruitment Consultant.

As one of the major companies in our field with a well-established professional reputation, we have both the resources and expertise to train you in the skills needed to carry out this challenging and rewarding work.

You must have a background in the computer industry, such as programming, analysis or any sales orientated position. Without this essential grounding you could not be expected to give career advice to applicants or advise clients in major recruitment assignments. Under 35 you should possess the potential to succeed in highly sales-oriented situations in which you will have the freedom to work very much on your own initiative.

The wide range of activities encompassed by the work will undoubtedly surprise you. You will also be interested in your training and career development. To find out the answers and much more about the varied and interesting life as a recruitment consultant, contact us to arrange an informal discussion and we will also tell you about the outstanding long-term career opportunities available.

EDP PROFESSIONALS CANADA

Systech Approach Consultants Ltd., is a Canadian company which provides EDP consulting services to government and industry. Increasing demand for these services has created openings within our company for experienced senior systems consultants.

If working in a highly professional environment, combined with the informality of a small company appeals to you, consider coming to Canada. We offer a wide range of interesting assignments plus a strong potential for professional growth. All positions are located in Ottawa, our National Capital.

We are particularly interested in those who have a proven record of accomplishment in one or more of the following areas:

- EDP PROJECT MANAGEMENT
- SYSTEMS ANALYSIS
- LARGE SCALE INFORMATION SYSTEMS
- MINI-COMPUTER SYSTEMS
- PROGRAMMING
- DATA BASE MANAGEMENT SYSTEMS
- COMPUTER COMMUNICATIONS

For more information, submit your Curriculum Vitae in confidence to the address below by June 8. Our representatives will be in London to conduct interviews starting June 18. Qualified candidates will be contacted by telephone to arrange interview appointments.

Attention: SACL

Barclaycard

Barclaycard's latest business development is providing a complete service for retailers' own cards.

The computer system — developed with the Barclaycard Computer Bureau — will need to progress in response to planned growth and the requirements of retailers.

The Project Team requires:

Systems Designer

who will specify the detailed requirements for the system and handle testing and implementation. Commencing Salary: £5,825.

Business Analyst

to work on related aspects of the system. Commencing salary: £4,018.

Education to a degree level or equivalent is required for the senior position, together with 4-5 years' relevant experience in a commercial or financial environment.

Fringe benefits normally associated with the retail industry.

For further information, please apply giving full details of your qualifications, experience and personal details, indicating which post you are applying for, to:

P. E. Kington, Manager, Staff Administration
Barclaycard, Northampton Way,
Telephone: (0800) 21700

Middle East assignments £12,000-£18,500

Logica, one of Europe's leading professional services companies, is continuing to expand its computing activities in the Middle East.

Our expansion in this area involves work for a wide variety of clients such as oil companies, banks, insurance companies and government agencies.

Specific vacancies exist for senior systems analysts and applications programmers capable of working in a wide range of application areas.

Senior Systems Analysts

- Commercial orientation with 7-8 years experience of which the last 4 should have been spent in design work.
- On-line and programming experience
- Successful record of systems implementation
- Preferably University Degree or Accounting Qualification
- Data base experience, in particular IDMS, would be useful.

Logica

Applications Programmers

We are seeking programmers with 3-7 years experience developing on-line systems.

We are particularly interested in two backgrounds:

- mainframe experience especially with large ICL 2900 under VME/B or VME/K
- minicomputer experience especially with DEC PDP/11 under RSTS or RSX

These posts offer an exceptional opportunity to join one of Logica's most rapidly expanding divisions at an early stage of development. Long term advancement and career prospects are excellent.

ADVANCED TECHNOLOGY SOFTWARE DESIGN

★ DESIGNERS ★

SENIOR DESIGNERS ★ PROJECT LEADERS
£6,500 P.A. TO £9,000 P.A.

One of the World leaders in the field of Telecommunications can offer experienced Software designers the opportunity of joining teams working on the most advanced Telecommunications system in the industry. At Project Leader level candidates will be able to make an immediate contribution based on 4-5 years' solid experience in Control Software and preferably a knowledge of Telecommunications systems. There are, however, opportunities at all levels and if you have any experience of real-time Software Design or High Level languages we strongly recommend that you contact us to discuss these openings.

The teams will be based WEST of LONDON in RURAL BERKSHIRE. The working environment at the Self-contained Research and Development centre is exceptionally good, and there is a very generous RELOCATION PACKAGE available to all candidates together with the usual large company benefits.

CURRENT PROJECTS

- ★ OPERATING SYSTEMS
- ★ COMPILERS
- ★ SIMULATION
- ★ TELECOMMUNICATIONS SOFTWARE

CORAL is the main software tool but FORTRAN, ALGOL or ASSEMBLER experience is useful.

CAREER PACKAGE

- ★ REMUNERATION — Thesa salary levels are realistic and negotiable on experience and potential.
- ★ PROSPECTS — The pace of development is such that having proved your ability, the positions of responsibility will find YOU.
- ★ EXPERIENCE — Quite simply, involvement in this nationwide project will put you at the head of your field.
- ★ TRAINING — In depth, on and off the job.

Senior DP Opportunities

West London

A major U.K. organisation having international interests in construction and engineering has recently restructured its centralised Management Systems Department in order to meet more effectively the demands of its users, and to take full advantage of available technology. As a result they have created the following new positions.

Business Systems Consultant

to £9,500

You will provide professional assistance to the management team of a specific subsidiary or major department. You will be responsible for investigating existing systems and procedures; recommending changes where appropriate and co-ordinating the development activity necessary to achieve the

identified objectives. You will be a graduate or professionally qualified with an appreciation of programming and experience in Systems Analysis or O & M. You will have conducted feasibility studies which on subsequent implementation have achieved the desired business benefits. Ref: 17071/CW.

Systems Development Controller

to £9,500

You will manage a team of analysts and programmers developing systems on mini computers and play an important role in the enhancement of DP facilities throughout the group. You should be a seasoned DP

professional with systems experience in a small business systems environment utilising either DEC, DEC or Prime equipment, and have had involvement in staff selection and management. Ref: 17072/CW.

Systems Support Co-ordinator

c. £8,500

Liaising with users and their business analysts, you will identify existing systems which need revision or extension, and also head up the section which provides the technical expertise. Applicants should be experienced

analysts with supervisory/management responsibility for a team which has included mini analysts and programmers, and have implemented at least one large system. Ref: 17073/CW.

Career prospects are excellent within this expanding group. The salaries quoted include a generous free car allowance, and there is a very attractive range of fringe benefits.

E. Sutton

These positions are open to male or female candidates. Please telephone in confidence for a Preliminary History Form quoting the appropriate reference to:

COMPUGRAPHICS INTERNATIONAL LIMITED

A PROGRAMMER

We are a company specialising in the production of photomasks for the microelectronics industry and make use of computer-aided plotters and photographic image generating equipment.

We are looking for a FORTRAN programmer, preferably with experience of a PDP11/40 running under the RSX-11M operating system.

The successful applicant will be responsible for the entire programming needs of the company which at present involves upgrading existing programs, presently running under DOS, to run under RSX-11M.

Preference will be given to people with a strong mathematical background and experience of programming for printed circuit board layout and/or microcircuits.

The salary is negotiable and will be commensurate with experience and qualifications.

UNIVERSITY OF
GLASGOW
COMPUTING SERVICE

Administrative Data
Processing Group
PROGRAMMER

Applications are invited from suitably qualified persons for the post of Programmer. The primary function of the above Group is to provide a student records data processing service, but a large variety of programming applications are in fact involved. All data and programs are being transferred to the University's own new ICL 2970 system from an IBM 370/150 computer at Glasgow. The person appointed would be involved both in the transfer and systems proving, and in new programming applications which are planned.

Applicants should be in the possession of, or should shortly expect to obtain, a University degree or equivalent professional qualification. Preference will be given to those with experience of programming or analysis in a data processing environment but prospective graduates in Computing Science may apply. Salary will be on Grade 1A of the Higher Education Staff Scale, from £4232-£7140 (increasing on 1st October 1979 to £4333-£7251), with initial placement dependent upon age, qualifications and experience.

Further particulars may be obtained from the Secretary of the University Court (Room 1.10), University of Glasgow, Glasgow G12 8QQ, with whom applications (6 copies), giving the name and address of three referees, should be lodged on or before 18th June, 1979.
In reply please quote Ref. No. 4400P.

MICRO-PROCESSOR SYSTEM SOFTWARE

We design, produce and sell one of the most advanced Word Processors in the world — the Diamond. We are a small, but rapidly expanding company with a modest ambition — we want to make the most advanced Word Processor in the world.

To further our ambition we are looking for programmers at all levels to design and implement new software — both enhancing the existing machine and building the next generation Word Processor. Emphasis is placed on individual effort and contribution — we believe that people who want to do, and can do, a good job, should be encouraged to get on with it.

As, currently, all software is written in assembler, some assembler experience is required. The Word Processor is an extremely sophisticated text editing and formatting engine, based on small real-time system, running on a Z-80 with 64K of ram. We are also involved in communications and the continued improvement of our in-house development systems.

Salary and Job Description depend on experience and so on, but we don't think we would disappoint you! If you are interested please ring, or write to: Maureen Hicks.
